3Design
SOFTWARE SOLUTION

www.3design.com

FAST, PROFESSIONAL, EFFICIENT

The only All-in-One 3D CAD Jewelry solution with Parametric / Associative technology.

Developed jointly with and for jewelers, 3DESIGN has established its leadership in delivering innovative solutions for the jewelry, watch and fashion accessories industries.

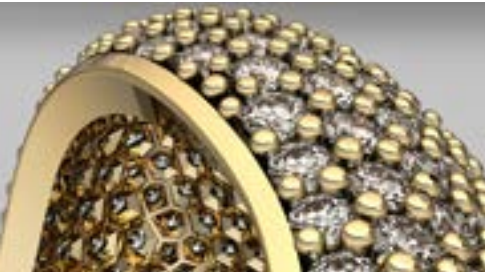

Measuring / Complete reporting

Advanced Pavé

Free stone setting

Ajour and Honeycomb

Stone inventory and stock + library

Baguette channel

Stay focused on creativity. Build your model starting with a hand sketch. Use the catalogue of 2D and 3D components. Or freely create from scratch using our professional jewelry wizards.

3DESIGN has the complete collection of functionalities to help you design efficiently, precisely and quickly.

Bring your ideas to the market, in a single and professional software environment!

Developed for you and compatible with Mac and Windows environments, the attractive interface and intuitive menus help you learn quickly. Jewelry specific and professional features help you work more efficiently and speed your workflow. Developed and enhanced continuously since 2003 with jewelry professionals; designers, engineers and consumers can collaborate efficiently. Powering the creative process, 3DESIGN has the tools you need, today, and for the future.

Design the models consumers want, experiment with shapes, faster than competition !

Thanks to the Parametric technology, easily create design concepts and explore variations on 3D forms. Each step of the design will be automatically saved in the Associative Construction Tree. Modify one or more parameters of your design; with a single click, recompute your entire model, during the Design phase, to fit your customer's wishes. Refine parts of the models before committing to production, to match technical constraints, in seconds, without having to redesign from scratch. All this, even days later!

3D Rendering and animation Studio

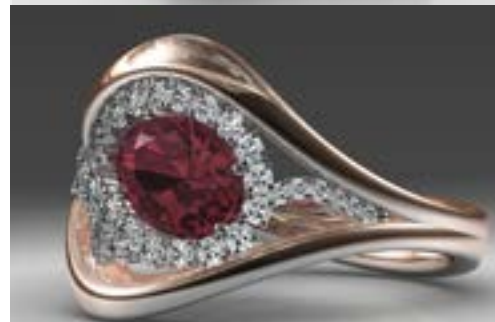

You can create high quality digital photos, with textured backgrounds, reflections, color lightings, watermarks and logos, etc. You can also produce 3D animations and 3D HD videos. Whether for your web site, digital catalogues, presentations or e-mails, 3DESIGN offers the solution you need.

3SHAPEr
SOFTWARE SOLUTION

The brilliant 3D sculpting module for 3DESIGN

For designers interested in pushing the design boundaries even further and to include freeform and organic shapes to their models, 3SHAPEr is their solution. Using subdivision modelling, designers can push, twist and bend models like they would with clay.

Training

We provide personalized training suited to your applications and company needs for faster return on investment and increase productivity. Training is available on site, at our locations and even remote online, worldwide.

Technical Support and Consultation

Our experts help and advise you to get the best out of your solution. They can be reached over the phone, by email or via remote computer access to always guarantee prompt and professional technical answers.

Performance Pack / Customer Care

We propose an entire set of services to assist you and ease your work with your solution including updates, special offers and promotions, online ongoing training and technical support, and much more.
