## Part 1 - Magic Sum Part 1

Have you ever seen anyone do mental math tricks quickly and wonder how they did it? In this activity, you will learn a trick that will involve adding a list of ten numbers in a split second.

1. Fill in the following table with the numbers generated by your class.

| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
|  |  |  |  |  |  |  |  |  |  |

2. Enter the two lists in L1 and L2. Find the sum of the numbers in the table above. On the Home screen, press 2nd [LIST] and select 5:sum(. Press 2nd [L2] [ ENTER to select $\mathbf{L} 2$ and carry out the command.
$\qquad$

| Normal | FLOAT Al | UTO REfR | Radian | MP | $\square$ |
| :---: | :---: | :---: | :---: | :---: | :---: |
| L1 | $L_{2}$ | L3 | L4 | Ls | 2 |
|  |  |  |  |  |  |
| 1 |  | -- | ------ | ------ |  |
| ${ }_{3}$ |  |  |  |  |  |
| 4 5 |  |  |  |  |  |
|  |  |  |  |  |  |
| ? 8 8 |  |  |  |  |  |
| ${ }_{19}$ |  |  |  |  |  |
|  |  |  |  |  |  |
| L2(1)= |  |  |  |  |  |

3. Was your teacher's sum correct? $\qquad$

## Part 2 - Magic Sum Part 2

4. Complete the table based on the rules discussed, using the numbers 7 and 5 .

| L1 | Each Element | Distributive Property | L2 |
| :---: | :---: | :---: | :---: |
| 1 | 7 |  |  |
| 2 | 5 |  |  |
| 3 |  |  |  |
| 4 |  |  |  |
| 5 |  |  |  |
| 6 |  |  |  |
| 7 |  |  |  |
| 9 |  |  |  |
| 10 |  |  |  |

$\qquad$
5. In the table, how many 7s are there? $\qquad$
6. How many 5 s are there? $\qquad$
7. Write the mathematical expression as: $\qquad$ $\times 7+$ $\qquad$ $\times 5$
8. What factor do 55 and 88 have in common? $\qquad$
9. Rewrite the expression as: $(11)(5)(7)+(11)(8)(5)=11(5 \times 7+8 \times 5)$. Verify that the expression is the same the one in Question 7. (Use your calculator to find the value of all three mathematical expressions.)
Are the expressions the same? $\qquad$
10. Is the number $5(7)+8(5)$ in the numerically generated list in the table for Question 4 ? If so, what number in the list? $\qquad$
11. Use sum(L2) to find the sum of the numbers generated in your table. Press [2nd [LIST] $\rightarrow$ and select 5 :sum(. Press [2nd [L2] $\square$ ENTER to select L2 and execute the command.

Sum $=$ $\qquad$
What is the summagic rule? $\qquad$

12. Work with a partner to choose your own numbers and find the sum using the summagic rule. Check your sum using sum(L2).
