Availability of the Xerox User Interface Print Drivers for Document Centre 4xx Products

Overview

The Xerox User Interface print drivers are Microsoft-based drivers with an XML-based user interface. These print drivers offer several advantages over the architecture of the enhanced and standard print drivers currently available. Until recently, Xerox User Interface print drivers were only available for Document Centre 5xx products and CentreWare 5.5 and the WorkCentre Pro products. Now, Xerox User Interface print drivers are also available for Document Centre 4xx products. You can find the 4xx Xerox User Interface print drivers in the Support and Drivers section on Xerox.com.

Features and Advantages

The Xerox User Interface print drivers provide the features and advantages described in the following list:

- A user-friendly interface with the same look and feel as the WorkCentre Pro products in addition to the full 400 series feature set.
- These drivers combine the stability of a Microsoft core (similar to older Standard drivers), with a user-friendly Xerox User Interface. The new drivers apply a user-friendly interface to NT Kernel mode drivers and user mode print drivers for Windows 2000 and newer Microsoft operating systems.
- The drivers for Windows 2000 and XP are user mode drivers. That is, the drivers run at the PC user level instead of at the kernel level like older Xerox Enhanced drivers. This method is recommended and greatly reduces the possibility of crashing a PC or server.
- Common software code allows Xerox support to address issues across product lines.
- Xerox user interface print drivers are supported in the Terminal Server and Citrix environments.

This document applies to these Xerox products:

	WC Pro 32/40 Color
	WC Pro 65/75/90
	WC Pro 35/45/55
	WC M35/M45/M55
	DC 555/545/535
x	DC 490/480/470/460
x	DC 440/432/425/420
	DC 340/332
	DC 265/255/240
	DC 230/220
	DCCS 50
