Updating Xerox Products and Solutions for Daylight Saving Time
Customer Tip

In a number of countries the time changes twice a year. This semi-annual time change requires that many Xerox products and solutions need to be updated to reflect the new time.

All Xerox products that support date/time can be changed manually at the device. However, some products support time changes via a Daylight Saving Time configuration feature, Network Time Protocol (NTP), Xerox CentreWare Web (CWW), or using Simple Network Management Protocol (SNMP).

Xerox CentreWare Web enables enterprises to update the time on many devices at one time. Xerox CentreWare Web helps systems administrators manage diverse printing environments from a single location using a web browser to perform multiple administrative functions.

The following table lists various Xerox products and solutions with the methods they support to update time settings. The table will be updated with information as it becomes available.

Products	DST Supported?	Time Change Options			Information
		Via CWW	**Via SNMP**	**Via NTP**	
Color 550/560		Y	Y	Y	The procedure to update this product via SNMP and CWW is available at http://www.office.xerox.com/support/dctips/dc_admin.html. The Network Time Protocol (NTP) can be setup locally at the device. Please refer to the 'Date and Time Settings' section within the product's System Administrator Guide.
ColorQube **- 8570** **- 8700** **- 8870** **- 9201/9202/9203** **- 9301/9302/9303**		Y	Y	Y	The procedure to update this product via Xerox CentreWare Web, and SNMP are available at http://www.office.xerox.com/support/dctips/dc_admin.html. An internal web interface is also available to change the time. Please refer to the product's User Guide for details.

Products	DST Supported?	Time Change Options			Information
		Via CWW	Via SNMP	Via NTP	
ColorQube 8700/8900	Y	Y	Y	Y	The procedure to update this product via Xerox CentreWare Web, and SNMP are available at http://www.office.xerox.com/support/dctips/dc_admin.html. An internal web interface is also available to change the time. Please refer to the product's User Guide for details. **NTP** By entering the IP address of an NTP time server, the product will change its time based on the time server's settings. We recommend setting the update interval to 4 hours or less. Please refer to the product's User Guide for detailed directions.

Phaser Products:
  4510
  5550
  6360
