---

## **Components Used**

The information in this document is based on these software and hardware versions:

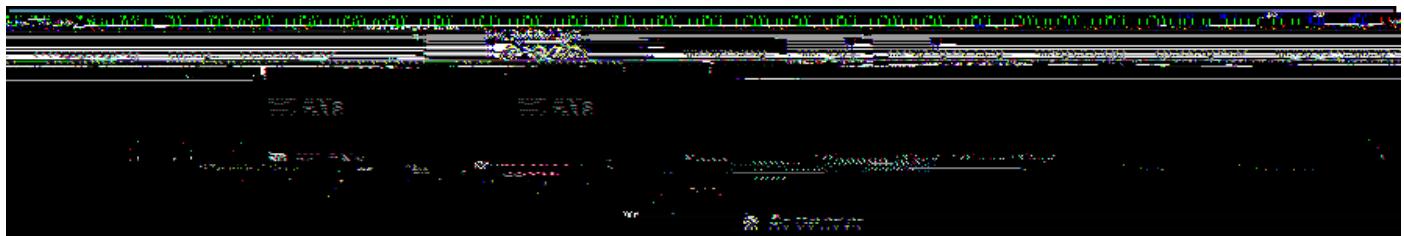

- WLC v8.3.102.0

## Create SSID

GUI:

Step 1. Open the GUI of the WLC and navigate to **WLANs > Create New > Go** as shown in the image.

Step 2. Choose a name for the SSID and profile, then click **Apply** as shown in the image.

CLI:

```
> config wlan create <id> <profile-name> <ssid-name>
```

Step 3. Assign the RADIUS server to the WLAN.

CLI:

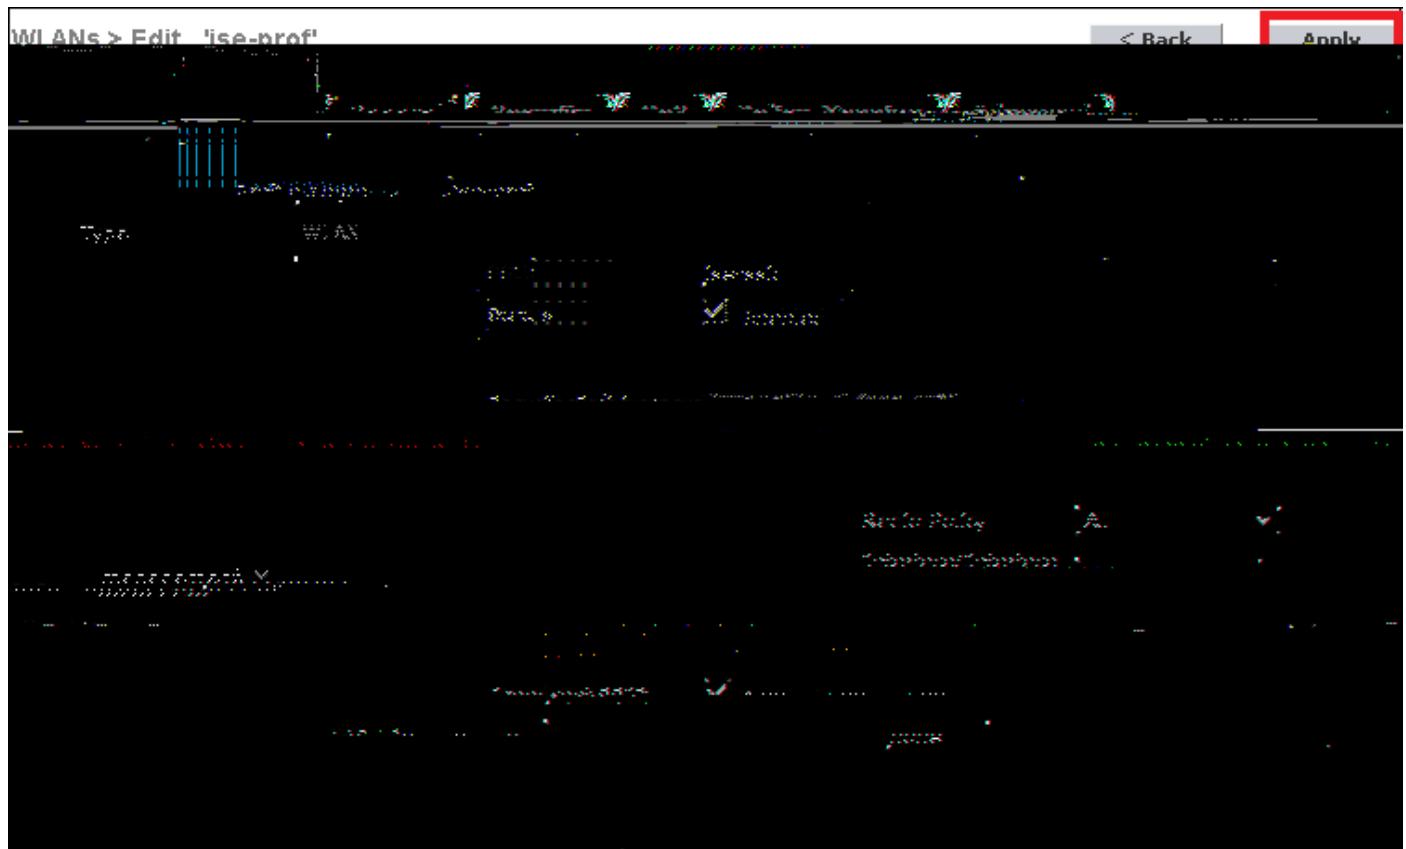

```
> config wlan radius_server auth add <wlan-id> <radius-index>
```

GUI:

Navigate to **Security > AAA Servers** and choose the desired RADIUS server, then hit **Apply** as shown in the image.

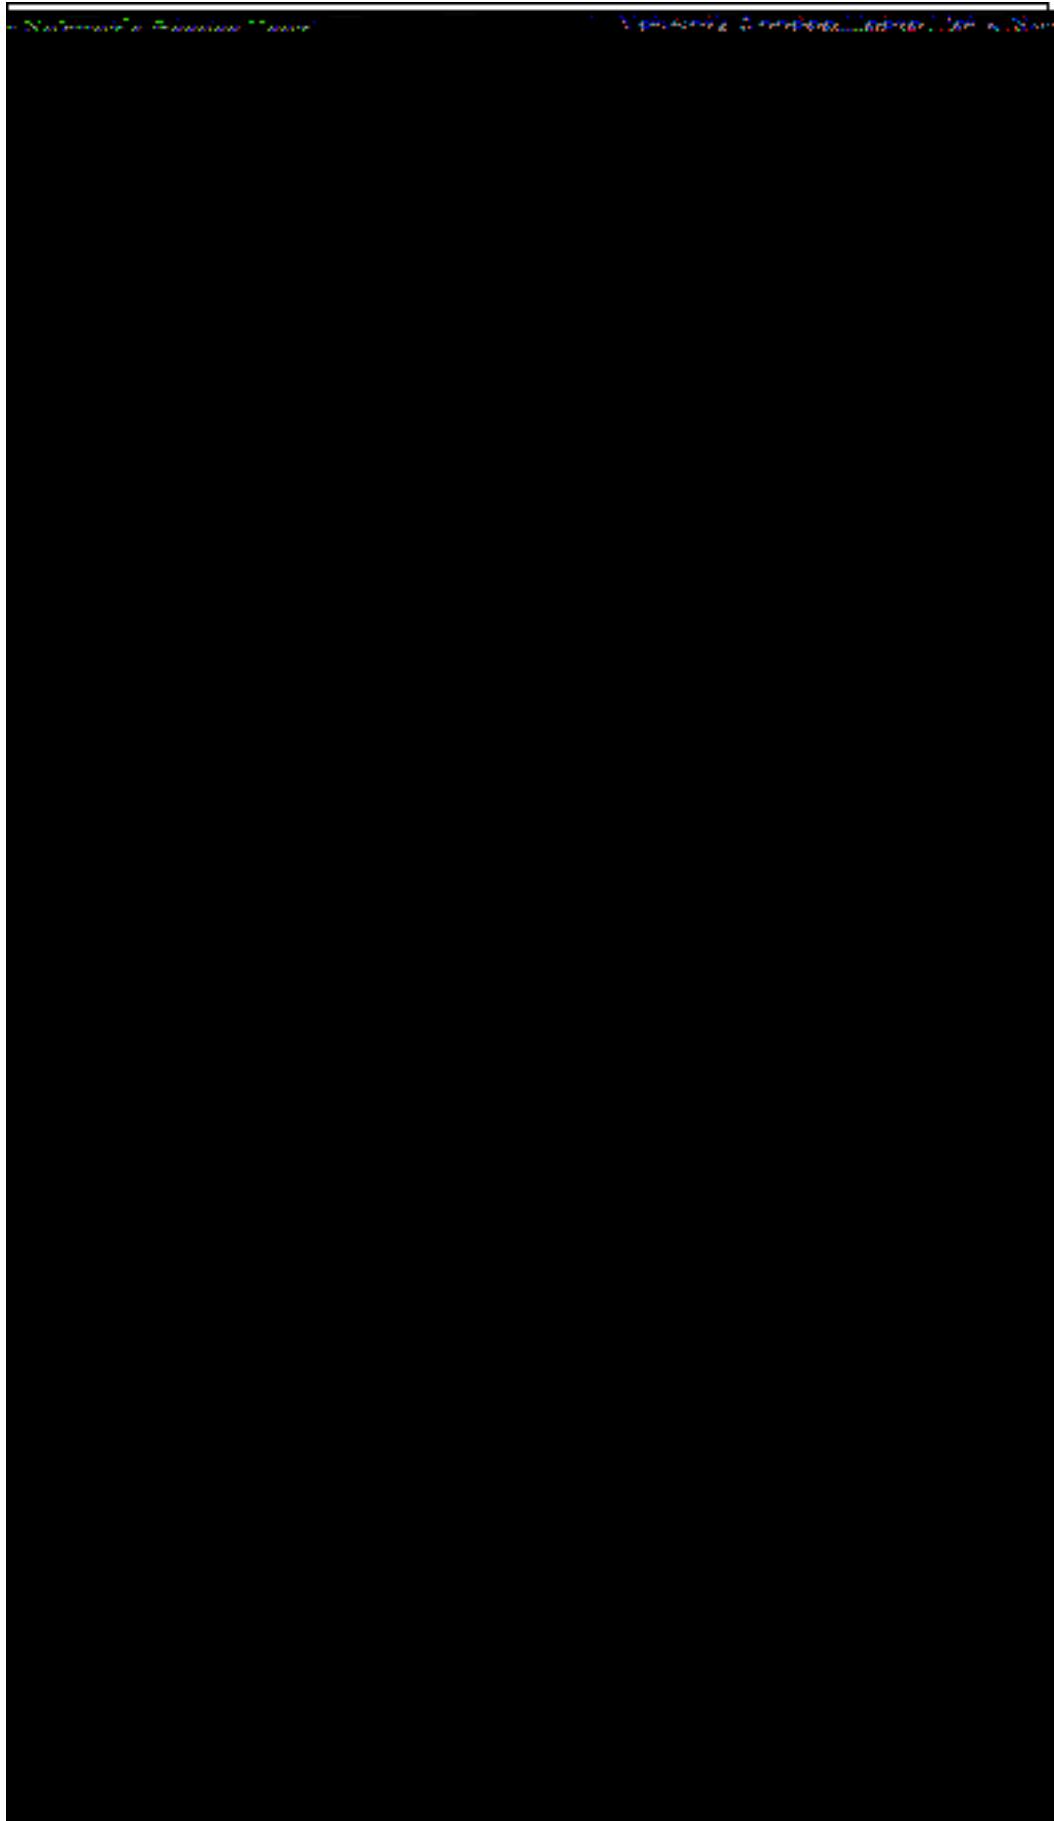

## Declare WLC on ISE

Step 1. Open ISE console and navigate to **Administration > Network Resources > Network**

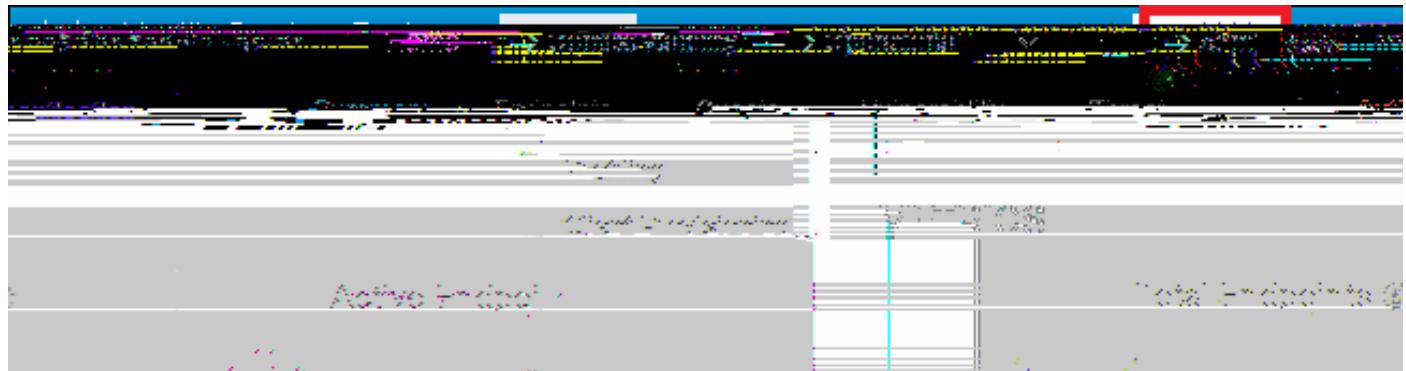

## Create Authentication Rule

Authentication rules are used to verify if the credentials of the users are right (verify if the user really is who it says it is) and limit the authentication methods that are allowed to be used by it.

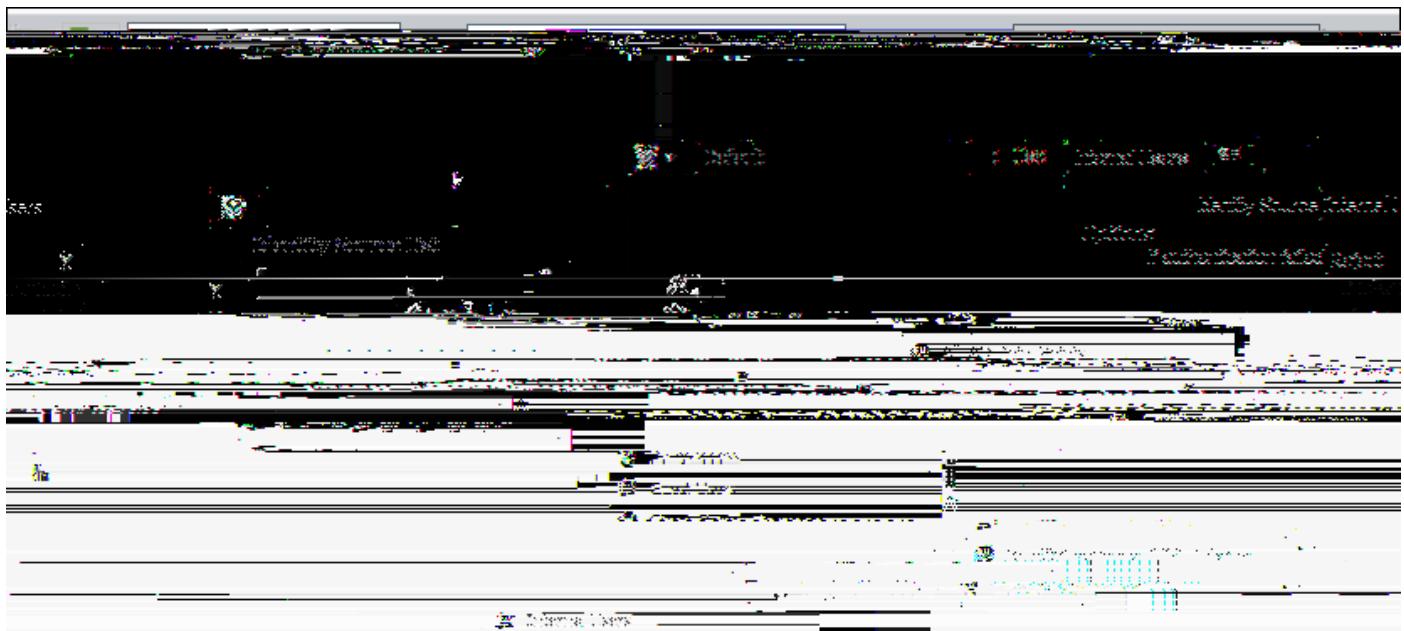

Step 1. Navigate to **Policy > Authentication** as shown in the image.

Step 2. Insert a new authentication rule as shown in the image.

Step 3. Enter the values.

This authentication rule allows all the protocols listed under the

Once finished, click **Done**
