

CISCO VALIDATED PROFILE

Wireless Education Vertical

April 2016

Table of Contents

Project Introduction	1
Security	1
Specialized Services	1
Migration to IPv6	1
Appendix A: IPv6 Transition Techniques	1
Appendix B: Specialized Services Overview	1
Appendix C: Security Best Practices	1

Profile Introduction

The Enterprise market segment can be divided into five broader verticals: Education, Healthcare, Retail, Service

HARDWARE PROFILE

Table 2 defines the set of relevant hardware, servers, test equipment, and endpoints that are used to complete the end-to-end Education Vertical Profile deployment.

The list of hardware, along with the relevant software versions and the role of these devices, complement the actual physical topology defined in Figure 1.

Table 2 A list of hardware components used in the deployment.

Hardware Component	Description	Software Versions	Role
Server 1	High-performance server for data processing	Ubuntu 20.04 LTS, Python 3.8, TensorFlow 2.4	Data Processing Node
