## Logging Out of Hunt Groups

When you are finished with a hunt group, you can log out of the group. To log out of a hunt group, click the **Logout** button in the top right corner of the hunt group page. This will log you out of the hunt group and return you to the main page.

## Prioritizing Critical Calls

- **Identify critical calls** (e.g., calls from emergency services, law enforcement, or individuals in crisis)
- **Assess the severity** of the situation and the potential impact on the community
- **Allocate resources** (e.g., personnel, equipment, and facilities) to respond to the most critical calls
- **Establish a communication protocol** to ensure that critical calls are handled efficiently and effectively
- **Monitor and evaluate** the response to critical calls to identify areas for improvement

---

1. The first step in the process of creating a new product is to identify a market need. This involves conducting market research to understand what consumers want and what is currently available in the market.

**Soft Key**

**Description**

- The second step is to develop a concept for the product. This involves creating a detailed description of the product and its features, benefits, and target market.
- The third step is to conduct a feasibility study. This involves evaluating the technical, financial, and market viability of the product concept.
- The fourth step is to create a business plan. This involves outlining the marketing, sales, and financial strategies for the product.
- The fifth step is to secure funding. This involves identifying potential investors and sources of capital to fund the product development process.
- The sixth step is to develop a prototype. This involves creating a physical or digital model of the product to test its design and functionality.
- The seventh step is to conduct a pilot test. This involves testing the product with a small group of consumers to gather feedback and identify any issues.
- The eighth step is to launch the product. This involves marketing and distributing the product to the target market.
- The ninth step is to monitor and evaluate the product's performance. This involves tracking sales, customer feedback, and market trends to assess the product's success and make any necessary adjustments.
