

FINANCIAL MANAGEMENT SOLUTIONS - INFORMATION SOLUTIONS

Software

*Documentation at
your fingertips*

*Training when and
where you need it*

*Increase employee job
satisfaction and
productivity*

Oracle PeopleSoft offers many information solutions to help you and your employees succeed. Take advantage of our PeopleBooks, Documentation Updates, Instructor-Led Training, Online Classes, User Productivity Kits (UPK), Self-Study CDs, Certification Programs, and other helpful information.

PeopleSoft Information Development and the entire PeopleSoft organization are dedicated to providing quality information solutions to help you and your employees succeed. To help manage your business and maximize the value of your software investment, just follow the links below.

PeopleSoft Information Portal

The PeopleSoft Information Portal provides you with a single entry point to locate the documentation, training, and other useful information you need to help with your implementation process and improve your daily experience with our products. Customers searching for this information should make this their first online destination.

<http://www.oracle.com/us/products/applications/054275.html>

PeopleBooks

Our FSCM PeopleBooks are available in three formats: Hosted PeopleBooks, PDFs, and Amazon's Kindle format. You can find all three versions available on the PeopleSoft Documentation page:

<http://www.oracle.com/technetwork/documentation/psftent-090284.html>

Hosted PeopleBooks

Our PeopleSoft Hosted PeopleBooks website allows you to access an HTML installation of our PeopleBook suite, including Search capabilities. This hosted solution also allows you to access PeopleBooks using the help link in your applications without having to install PeopleBooks on your own server. To enable context sensitive help, follow the simple instructions on the website's opening page.

Upgrade Resources Reports Tool

The PeopleSoft Upgrade Resources Report Tool is an interactive tool that displays a report with links to all documentation and files you need for your upgrade project. The new tool helps you find all the documentation, scripts, and files you need for your upgrade project. You simply identify your product line, your existing release, and your

new release. With a single click the tool quickly produces a customized set of links to all the documentation and files needed for your upgrade project.

Follow the link below to access the FSCM Upgrade Resources Report tool.

[Document 1110984.1](#)

FMS Cumulative Feature Overview Tool [Document 793151.1](#)

The Cumulative Feature Overview Tool provides concise descriptions of new and enhanced solutions and functionality that have become available between your starting and target releases. Customers simply identify the products they own, their existing release, and their target implementation release. With a single click the tool quickly produces a customized set of high-level, concise descriptions of features developed between their starting and target releases.

Entity Relationship Diagrams (ERDs)

PeopleSoft uses entity-relationship models in the design of the various applications. Entity relations diagrams (ERD's) capture the relationships between, details of, and constraints imposed on the data defined in these models. ERD's provide a visual representation of the database scheme to aid customers in the understanding and customization to the PeopleSoft application. [Document 1074856.1](#)
