ORACLE®

Applications Licensing Table

The Applications Licensing Table provides an overview of Oracle's licensing rules and restrictions for use of specific Oracle Applications with specific Oracle Technology. This document is broken into the following sections:

– **Oracle Application Specific Technology Products**

– **Oracle Application Integration Architecture**

– **Oracle E-Business Suite Applications**

– **Oracle Business Intelligence Publisher**

– **Oracle Demantra**

– **Oracle Governance, Risk, and Compliance**

– **Oracle JD Edwards EnterpriseOne**

– **Oracle Master Data Management**

– **Oracle Policy Automation**

– **Oracle Primavera**

– **Oracle Self-Service E-Billing Business Edition**

– **Oracle Self-Service E-Billing Consumer Edition**

– **Oracle Siebel Mobile Sales Assistant Data Access**

– **Oracle Siebel Warranty Validation Server**

Oracle Application Specific Technology Products

Oracle Application Specific Technology Products are available on the Oracle Technology Global Price List. These Application Specific Technology Products include:

– **Application Management Pack for Oracle Fusion Applications**
– **Berkeley DB – High Availability for Oracle Applications**
– **Berkeley DB – Transactional Data Store for Oracle Applications**
– **Berkeley DB Java Edition – High Availability for Oracle Applications**
– **Berkeley DB Java Edition – Transactional Data Store**
– **BPEL Process Manager for Oracle Applications**
– **Business Intelligence Foundation Suite for Oracle Applications**
– **Business Intelligence Publisher for Oracle Applications**
– **Business Intelligence Suite Enterprise Edition Plus for Oracle Applications**
– **Coherence Enterprise Edition for Oracle Applications**
– **Data Integrator Enterprise Edition for Oracle Applications**
– **Identity and Access Management Suite for Oracle Applications**
– **In-Memory Database Cache for Oracle Applications**
– **SOA Suite for Oracle Middleware for Oracle Applications**
– **TimesTen Application-Tier Database Cache for Oracle Applications**
– **Unified Business Process Management Suite for Oracle Applications**
– **WebCenter Imaging for Oracle Applications**
– **WebCenter Portal for Oracle Applications**
– **WebLogic Suite for Oracle Applications**

Note: please refer to Oracle Technology Global Price List and the Oracle Technology Global Price List Supplement for details on pricing and licensing as well as consult with your Oracle sales representative for more information.

Programs that contain "for Oracle Applications" in the program name are limited use programs. These limited use programs may only be used with "eligible" Oracle applications programs that contain the following prefixes in the program name:

- **Oracle Argus**

- **Oracle ATG**

- **Oracle Communications** (except: Oracle Communications Billing and Revenue Management Integration Pack for Oracle E-Business Suite: Revenue Accounting)

- **Oracle Documaker**

- **Oracle Endeca** (except: Endeca Information Discovery; and Endeca Server)

- **Oracle Enterprise Taxation** (except: Oracle Enterprise Taxation Management Integration to Oracle E-Business Suite Financials General Ledger and Accounts Payable: Oracle Enterprise Taxation Management Integration to Siebel Public Sector for Taxpayer Service; Oracle Enterprise Taxation Management Integration to Siebel Public Sector for Case Management; and Oracle Enterprise Taxation Management Integration to PeopleSoft Enterprise Financials General Ledger and Accounts Payable)

- **Oracle Financial Services** (except: Oracle Financial Services Provisioning)

- **Oracle FLEXCUBE**

- **Oracle Fusion**

- **Oracle Health Sciences**

- **Oracle Healthcare** (except: Oracle Healthcare Transaction Base)

- **Oracle Hospitality**

- **Oracle Insurance**

- **Oracle Knowledge**

- **Oracle Legal**

- **Oracle Mantas**

- **Oracle Media**

- **Oracle Primavera**

- **Oracle Relate**

- **Oracle Retail** (except: Oracle Retail Merchandising Integration Pack for PeopleSoft Enterprise Financials: Financial Operations Control)

- **Oracle Reveleus**

- **Oracle Tax**

- **Oracle Utilities** (except: Oracle Utilities Customer Care and Billing Integration to JD Edwards Financials for General Ledger and Accounts Payable; Oracle Utilities Customer Care and Billing Integration to PeopleSoft Enterprise Financials for General Ledger and Accounts Payable; Oracle Utilities Customer Care and Billing Integration to Oracle E-Business Suite Financials for General Ledger and Accounts Payable; Oracle Utilities Customer Care and Billing Integration to Oracle Utilities Meter Data Management; and Oracle Utilities Customer Care and Billing Integration to Oracle Utilities Network Management System)

  Note: the following two Oracle Utilities products are also eligible for use with the Application Specific Technology Products: **Oracle Mobile Workforce Management Extractors and Schema**, and **Oracle Mobile Workforce Analytics**.

- **Oracle XBRi**

Notwithstanding anything above, **Business Intelligence Suite Enterprise Edition Plus for Oracle Applications** may only be used with "eligible" Oracle application programs that contain "Oracle Fusion Human Capital Management" as a prefix in the program name and provided that the Oracle Fusion Human Capital Management programs are the only programs configured to run against the database instance.

WebLogic Suite for Oracle Applications is eligible for use with Oracle application programs that contain "Oracle Agile" as a prefix in the product name.

Business Intelligence Foundation Suite for Oracle Applications is eligible for use with the following eight Oracle Business Intelligence Applications provided Oracle Fusion Applications is the only data source:

- Financial Analytics, Fusion Edition;

- Human Resources Analytics, Fusion Edition;

- Marketing Analytics, Fusion Edition;

- Partner Analytics, Fusion Edition;

- Procurement & Spend Analytics, Fusion Edition;

- Project Analytics;

- Sales Analytics, Fusion Edition; and

- Supply Chain and Order Management Analytics, Fusion Edition.

Oracle Business Intelligence Foundation Suite for Oracle Applications is also eligible for use with the following three programs: Oracle Product Information Management Analytics, Fusion Edition; Oracle Customer Data Management Analytics, Fusion Edition (both listed on the Oracle Business Intelligence Applications Global Price Lists); and Oracle Product Lifecycle Analytics (available on the Oracle E-Business Suite Applications Global Price List). Any use of limited use programs containing "for Oracle Applications" by other Oracle applications or third party applications is not permitted.

Additional Requirements
In addition, the following 11 Application Specific Technology Products have additional requirements that have to be met:

– Oracle Application Management Pack for Oracle Fusion Applications

– Oracle BPEL Process Manager Option for Oracle Applications

– Oracle Business Intelligence Foundation Suite for Oracle Applications

– Oracle Business Intelligence Suite Enterprise Edition Plus for Oracle Applications

– Oracle Coherence Enterprise Edition for Oracle Applications

– Oracle Data Integrator Enterprise Edition for Oracle Applications

– Oracle Identity and Access Management Suite Plus for Oracle Applications

– Oracle SOA Suite for Oracle Middleware for Oracle Applications

– Oracle WebCenter Imaging for Oracle Applications

– Oracle WebCenter Portal for Oracle Applications

– Oracle WebLogic Suite for Oracle Applications

The additional requirements for these above 11 products are as follows:

Oracle Application Management Pack for Oracle Fusion Applications can only be licensed with WebLogic Suite/WebLogic Suite for Oracle Applications, together with the SOA Suite for Oracle Middleware/SOA Suite for Oracle Middleware for Oracle Applications and must match the number of licenses to the associated WebLogic Suite/WebLogic Suite for Oracle Applications and the SOA Suite for Oracle Middleware/SOA Suite for Oracle Middleware for Oracle Applications.

Oracle BPEL Process Manager Option for Oracle Applications may be used only to enable business processes, workflow interactions and approvals within Oracle Applications. Workflow interactions between Oracle and non Oracle Applications are allowed as long as they are enabled/initiated within Oracle Applications. Business Processes defined in BPEL are allowed as long as at least one of the services invoked from within the Business Process access an Oracle Application either natively (via Web Services) or via an adapter.

Oracle Business Intelligence Foundation Suite for Oracle Applications may be used only to perform query, reporting and analysis against a transaction database, data warehouse or an Essbase OLAP cube if: (i) the transaction database is an Oracle Applications transaction database itself or an extraction, in whole or in part, of an Oracle Applications transaction database, without transformation (query, reporting and analysis against a transaction database that is not an Oracle Applications transaction database requires a full use license of Oracle Business Intelligence Foundation Suite); or (ii) the data warehouse is a pre-packaged Oracle Applications data warehouse, with any customizations necessary to reflect customizations in the Oracle Applications, and restricted only to the Oracle Applications sources (query, reporting and analysis against extensions to the data warehouse drawn from source systems not supported by the pre-packaged data warehouses require a full use license of Oracle Business Intelligence Foundation Suite); or (iii) the dimensions of each Essbase OLAP Cube are sourced from Oracle Applications.

Oracle Business Intelligence Suite Enterprise Edition Plus for Oracle Applications (as noted previously in this document) may only be used with "eligible" Oracle application programs that contain "Oracle Fusion Human Capital Management" as a prefix in the program name and provided that the Oracle Fusion Human Capital Management programs are the only programs configured to run against the database instance.

Oracle Coherence Enterprise Edition for Oracle Applications is limited for use within the same JVM as the Oracle Applications components.

Oracle Data Integrator Enterprise Edition for Oracle Applications may only be used with the Oracle supplied data integration jobs and customization of the supplied jobs is allowed. For the avoidance of doubt, examples of uses that are not permitted include, but are not limited to, the following: adding new jobs that support different applications, new schemas, or previously unsupported application modules.

Oracle Identity and Access Management Suite Plus for Oracle Applications may be used only to perform associated actions for users of and within the eligible Oracle Applications. Oracle Identity and Access Management Suite Plus for Oracle Applications may be used to do the following: (1) add, delete, modify, and manage user identities and roles in the eligible Oracle Applications; (2) provide web access management and single sign-on into eligible Oracle Applications; (3) provide data storage - or virtualization to data storage - of user identities and user identity related information or authentication and authorization policies for eligible Oracle Applications; (4) provide federated single sign-on to eligible Oracle Applications.

Oracle SOA Suite for Oracle Middleware for Oracle Applications may be used only to enable integration, business processes, workflow interactions and approvals within eligible Oracle Applications. Workflow interactions between eligible Oracle Applications and other Oracle applications or third party applications are allowed as long as they are either initiated or terminated within eligible Oracle Applications. Usage of SOA composites (including but not limited to Rules, Mediator, XSLT transforms, BPEL processes, Spring components, Workflow services and OWSM security policies) is allowed as long as at least one of the services invoked from within each composite accesses an eligible Oracle Application either natively (via Web services) or via an adapter. Oracle Service Bus (OSB) usage is allowed as long as each service deployed accesses an eligible Oracle Application either natively (via Web services) or via an adapter.

Oracle WebCenter Imaging for Oracle Applications may be used to create and modify imaging searches, modify pre-packaged imaging application document types, and create and modify input mappings to imaging applications. Imaging can also invoke Web service API's from Oracle Application workflows. A full-use license of WebCenter Imaging is required to define new document types for the management of images unrelated to a pre-packaged Oracle Applications integration, develop custom workflows, and invoke APIs from custom workflows or custom application integrations.

Oracle WebCenter Portal for Oracle Applications can be used only to surface the eligible Oracle application and custom applications. Surfacing any third-party applications, including other applications from Oracle, requires a full-use license. Multiple eligible Oracle applications can be surfaced in a single portal instance provided that a WebCenter Portal for Oracle Applications license exists for each eligible application surfaced in the portal. WebCenter Portal for Oracle Applications can be used to integrate the various WebCenter Services (Wikis, Blogs, Discussions, etc.) into an application context, as well as build out custom workflows and notifications between the eligible Oracle application and WebCenter Portal components. The content management features can be used to store and manage documents created outside the eligible application provided that they are related to the eligible application or application context.

Oracle WebLogic Suite for Oracle Applications may be used only as an embedded runtime for eligible Oracle Applications or to deploy customizations to an eligible Oracle Application. The WebLogic global datasource or one of the WebLogic application datasources must be configured to access the schema of an eligible Oracle Application.

Oracle Application Integration Architecture

All Application Integration Architecture (AIA) products listed in the following pages include restricted-use rights of Oracle Technology and must adhere to the full-use rules noted below.

All Application Integration Architecture (AIA) pre-built integrations include restricted-use licenses of supporting Oracle Technology products/components that can be used to configure, modify and extend the integration packs to meet customer's business requirements within the context of the delivered business process and Application(s).

However, full-use licenses of the necessary Oracle Technology products would be required if a customer wishes to do either of the following:

1) Add another application system (a "new spoke") to the AIA pre-built integration (i.e., a new application beyond the original applications the AIA program provided integration for); or

2) Use additional Enterprise Business Objects (EBO) from the Foundation Pack Library.

1) In cases where an additional application system is added to the Application Integration Architecture pre-built integration, but no additional Enterprise Business Object is used from the Foundation Pack Library, full-use licenses of the following Oracle Technology products are required:

   i. WebLogic Suite (for use of Internet Application Server Enterprise Edition)
   ii. SOA Suite for Oracle Middleware
   iii. Data Integrator Enterprise Edition (when used in the pre-built integration)
   iv. Oracle Database Enterprise Edition

Example: A customer buys the "Order-to-Cash" Process Integration Pack between Siebel CRM and Oracle E-Business Suite and now wants to add another system such as the customer's own "web order portal" to support the same business process.   This would be considered another application system and would require full-use licenses of the Oracle Technology products noted directly above. Another application system could also be another application instance, custom built, legacy or a third-party application system.

2) In cases where an additional Enterprise Business Object from the Foundation Pack Library is used, full-use licenses of the following Oracle Technology products and AIA product are required:

   i. WebLogic Suite (for use of Internet Application Server Enterprise Edition)
   ii. SOA Suite for Oracle Middleware
   iii. Data Integrator Enterprise Edition (when used in the pre-built integration)
   iv. Oracle Database Enterprise Edition
   v. Application Integration Architecture Foundation Pack

Example: A customer buys the "Order-to-Cash" Process Integration Pack between Siebel CRM and Oracle E-Business Suite and now wants to extend the integration to include a new business object, such as "Asset" or integration flow, such as "Payment Terms."   This would require full-use licenses of the Oracle Technology products noted directly above.

Oracle Service Registry is an optional component for Application Integration Architecture Foundation Packs and/or Process Integration Packs. You can install and use AIA products without Oracle Service Registry. However, if a customer wants to use Oracle Service Registry to manage only AIA objects and services at runtime, a restricted-use license of Oracle Service Registry is included.

The restricted-use license of Oracle Service Registry allows customers to view/edit objects and services included with AIA products. If a customer wants to use Oracle Service Registry to manage other content than standard out-of-the-box AIA content, the purchase of a full-use license of Oracle Service Registry is required.

Restricted-use license of Oracle Service Registry for AIA is limited to the following:

1) Viewing and consuming Oracle AIA content (Oracle intellectual property) available with their licensed AIA Foundation Pack and/or Process Integration Packs. The pre-built AIA content includes: Services/Binding Templates (WSDL), Schemas (XSD) and Transforms (XSLT/XQUERY);

2) Making limited modifications and extensions to the AIA content only in accordance with the AIA extension mechanism, and not for other purposes:

       I. Adding custom attributes to the AIA schemas
       II. Adding corresponding transforms for the custom attributes
       III. Modifying out-of-the-box AIA services taxonomy/categorization
       IV. Modifying out-of-the-box AIA endpoint binding templates
       V. Adding new taxonomies or models to categorize (1) the out-of-the-box and (2) the extended Oracle AIA content

Any of the following conditions would trigger the full-use license of Oracle Service Registry with AIA:

       I. Adding custom business services
       II. Adding new operation to an existing service
       III. Registering your own in-house services
       IV. Adding new taxonomies or models to categorize customer specific content (from 1, 2, 3 above)
       V. Modifying attributes and other metadata in Oracle Service Registry other than through the AIA extension mechanism

The following Application Integration Architecture (AIA) products include restricted-use rights of Oracle Technology and must adhere to the full-use rules noted above:

Application Integration Architecture Process Integration Packs
- Agile Product Lifecycle Management Integration Pack for Oracle E-Business Suite: Design to Release
- Agile Product Lifecycle Management Integration Pack for SAP: Design to Release Communications
- CRM On Demand Integration Pack for JD Edwards EnterpriseOne: Lead to Order
- Communications Order to Cash Integration Pack for Oracle Communications Billing and Revenue Management
- Communications Order to Cash Integration Pack for Oracle Communications Order and Service Management
- Communications Order to Cash Integration Pack for Siebel CRM
- Customer Data Synchronization Pack for Oracle Utilities Customer Care and Billing and Siebel Energy
- Design to Release Integration Pack for Agile Product Lifecycle Management and JD Edwards EnterpriseOne
- Design to Release Integration Pack for Agile Product Lifecycle Management for Process and Oracle E-Business Suite Process Manufacturing
- Driver Management Integration Pack for Oracle Transportation Management and Oracle E-Business Suite
- Financial Management Integration Pack for Oracle Transportation Management and Oracle E-Business Suite
- Financial Operations Control Integration Pack for Oracle Retail Merchandise Operations Management and E-Business Suite Financials
- Financials Accounting Hub Integration Pack for PeopleSoft General Ledger
- Lead to Order Integration Pack for Oracle CRM On Demand and Oracle E-Business Suite
- Lead to Order Integration Pack for Oracle CRM On Demand and JD Edwards World
- Order Management Integration Pack for Oracle Transportation Management, Oracle E-Business Suite and Siebel CRM
- Order to Activate Integration Pack Siebel CRM and Oracle Communications Order and Service Management
- Order to Cash Integration Pack for Siebel CRM and SAP
- Process Integration Pack for Oracle Utilities Field Work
- Product Data Synchronization Integration Pack for Oracle Utilities Customer Care and Billing and Siebel Energy

- Project Portfolio Management Integration Pack for Primavera P6 and JD Edwards EnterpriseOne
- Project Portfolio Management Integration Pack for Primavera P6 and Oracle E-Business Suite
- Retail Merchandising Integration Pack for PeopleSoft Enterprise Financials: Financial Operations Control
- Serialization and Tracking Integration Pack for Oracle Pedigree and Serialization Manager and Oracle E-Business Suite
- Siebel CRM Integration Pack for Account Originations - Liability Products
- Siebel CRM Integration Pack for i-flex FLEXCUBE Account Originations - Liability Products
- Siebel CRM Integration Pack for Oracle Communications Billing and Revenue Management: Order to Bill
- Siebel CRM Integration Pack for Oracle Communications Billing and Revenue Management: Agent Assisted Billing Care
- Siebel CRM Integration Pack for Oracle Order Management
- Siebel CRM Integration Pack for Trade Promotion Management
- Study, Subject, and Visit Synchronization Integration Pack for Siebel Clinical and Oracle Clinical

Application Integration Architecture Process Integration Packs (Base + Options)
- Customer Master Data Management Integration Base Pack
- Customer Master Data Management Integration Option
- Product Master Data Management Integration Base Pack
- Product Master Data Management Integration Option

Application Integration Architecture Partial Process Integration Packs
- Clinical Trial Payments Integration Pack for Siebel Clinical
- Workforce Administration Integration Pack for PeopleSoft Human Resources

Application Integration Architecture Direct Integrations
- Communications Billing and Revenue Management Integration Pack for Oracle E-Business Suite: Revenue Accounting
- CRM On Demand Integration to Siebel CRM
- Demantra Integration Pack for Siebel CRM Consumer Goods
- Demantra Sales and Operations Planning Integration to Hyperion Planning
- Enterprise Taxation Management Integration to Oracle E-Business Suite Financials General Ledger and Accounts Payable
- Enterprise Taxation Management Integration to PeopleSoft Enterprise Financials General Ledger and Accounts Payable
- Enterprise Taxation Management Integration to Siebel Public Sector for Case Management
- Enterprise Taxation Management Integration to Siebel Public Sector for Taxpayer Service
- Siebel Call Center Integration Pack for Oracle Adverse Event Reporting System
- Siebel Field Service Integration to Oracle Real-Time Scheduler
- Siebel CRM Integration to Oracle Incentive Compensation
- Utilities Customer Care and Billing Integration to JD Edwards Financials for General Ledger and Accounts Payable
- Utilities Customer Care and Billing Integration to Oracle E-Business Suite Financials for General Ledger and Accounts Payable
- Utilities Customer Care and Billing Integration to Oracle Utilities Meter Data Management
- Utilities Customer Care and Billing Integration to Oracle Utilities Network Management System
- Utilities Customer Care and Billing Integration to PeopleSoft Enterprise Financials for General Ledger and Accounts Payable
- Utilities Meter Data Management Integration to SAP Meter Data Unification and Synchronization
- Value Chain Planning Integration Base Pack

Oracle Technology Prerequisites Rules for Oracle E-Business Suite Applications

This section provides an overview of Oracle's licensing prerequisites for the underlying database and other technologies when license Oracle E-Business Suite Applications as it relates to the level of modifications that are performed to the application programs. Additional prerequisites may apply to specific application programs, please contact your Oracle sales representative for more information.

Please note that there are two tables: one table applicable for orders after February 28, 2007 (see pages 3 and 4); and one table applicable for orders up to and including February 28, 2007 (see pages 5 and 6).

Oracle distinguishes between three levels of modifications to its Oracle E-Business Suite Applications, which have increasing licensing requirements for the underlying database and other technologies. These modification levels are:

No Modifications: The customer is deploying the application without modifications. In this case, the customer receives a restricted-use license for the Oracle Database Enterprise Edition, Oracle Internet Application Server Enterprise Edition, which includes WebLogic Server Basic, and a limited set of other products. This restricted-use license may only be used to run with the licensed application(s); it cannot be used for any other purposes.

Modifications implemented as Java programs and/or modifications to Forms, Reports and/or Workbooks: These modifications include any creation or modification of reports, forms, and/or workbooks. In addition, modifications implemented as Java programs, which include Java that produces html interface or Java business logic fall under this category. In these two scenarios, the customer receives a restricted-use license for the Oracle Database Enterprise Edition and a limited set of other products. This restricted-use license may only be used to run with the licensed application(s); it cannot be used for any other purposes. Additionally, the customer is required to purchase licenses for a limited set of products, including Oracle Internet Application Server Enterprise Edition for the total number of end users[1] or processors for which the modifications are deployed.

Modifications to the database: Examples of these modifications include adding and/or modifying the tables, columns, stored procedures and triggers, which are the part of Oracle E-Business Suite application schema. In this situation, the customer is required to purchase licenses for the Oracle Database Enterprise Edition, as well as Oracle Internet Application Server Enterprise Edition for the total number of end users[1] or processors for which the modifications are deployed. The customer receives a restricted-use license of a limited set of products. Additionally, a limited set of other products is required to be licensed as defined in the following table.

Note: If the date of your order was after February 28, 2007 and you were not an existing Oracle E-Business Suite Applications customer as of that date, please use the table on the follow page.

Types of Modification to Oracle's E-Business Suite Applications	To be licensed in addition to the Oracle E-Business Suite Application(s)		
	Oracle Database Enterprise Edition	Oracle Internet Application Server Enterprise Edition	Oracle Development Tools & Technology
No Modifications	**Not Required.** Restricted-use license may only be used to run licensed Oracle E-Business Suite Applications.	**Not Required.** Restricted-use license may only be used to run licensed Oracle E-Business Suite Applications.	**Not Required.** Oracle Alert, Application Object Library, Report Manager, Oracle Applications Manager, EDI Gateway, XML Gateway. **Restricted-use:** Internet Developer Suite for installing and configuring discoverer workbooks and end user layer content. Additionally, Internet Developer Suite for warehouse metadata to support EDW delivered with Oracle Apps (Forms and Report Builders for diagnostics purposes only). Oracle Programmer for the underlying technology as invoked by the unmodified E-Business Suite Applications. Restricted-use for Oracle licensed applications users only: Business Intelligence Publisher[2] to publish information from Oracle Applications.
Modifications implemented as Java programs which include Java that produces html interface or Java business logic **AND/OR** **Modifications to Forms, Reports, and/or Workbooks**	**Not Required.** Restricted-use license may only be used to run licensed Oracle E-Business Suite Applications	**Licenses required:** For total number of end users[1] or Processors for which the modifications are deployed.	**Not Required:** Oracle Alert, Application Object Library, Report Manager, Oracle Applications Manager, EDI Gateway, XML Gateway. **Restricted -use:** Oracle Programmer for the underlying technology as invoked by the unmodified E-Business Suite Applications. **Licenses required:** Internet Developer Suite and/or Discoverer Desktop Edition for developers making modifications; JDeveloper for all developers who build Java programs which access application schema and who are not licensed for Internet Developer Suite; For client server workbooks, Discoverer Desktop Edition for total number of actual users[3].
Modifications to the Database	**License required:** For total number of actual users[3] or Processors.	**License required:** For total number of end users[1] or Processors for which the modifications are deployed.	**Not required:** Oracle Alert, Application Object Library, Report Manager, Oracle Applications Manager, EDI Gateway, XML Gateway. **License required:** Internet Developer Suite and Oracle Programmer for developers making modifications; JDeveloper for developers who use to build Java programs which access application schema and who are not licensed for Internet Developer Suite; For client server workbooks, Discoverer Desktop Edition for total number of actual users[3].

Notes

[1] End Users: All users and/or devices accessing modified E-Business Suite Applications running on Oracle Database must be licensed. Minimums must be met.

[2] Business Intelligence Publisher (BI Publisher): E-Business Suite Applications include a restricted use of BI Publisher (see restricted-use information in Business Intelligence Publisher section).

[3] Actual Users: All users and/or devices accessing E-Business Suite Applications running on Oracle Database must be licensed. Minimums must be met.

If the date of your order was prior to or on February 28, 2007, please use the following table:

Types of Modification to Oracle's E-Business Suite Applications	To be licensed in addition to the Oracle E-Business Suite Application(s)		
	Oracle Database Enterprise Edition	Oracle Internet Application Server Enterprise Edition	Oracle Development Tools & Technology
No Modifications	Not Required. Restricted-use license may only be used to run licensed Oracle E-Business Suite Applications.	Not Required. Restricted-use license may only be used to run licensed Oracle E-Business Suite Applications.	Not Required. Oracle Alert, Application Object Library, Report Manager, Oracle Applications Manager, EDI Gateway, XML Gateway. Restricted -use: Internet Developer Suite for installing and configuring discoverer workbooks and end user layer content. Additionally, Internet Developer Suite for warehouse metadata to support EDW delivered with Oracle Apps (Forms and Report Builders for diagnostics purposes only). Oracle Programmer for the underlying technology as invoked by the unmodified E-Business Suite Applications. Restricted-use for Oracle licensed applications users only: Customer Data Hub, Business Intelligence Publisher[2] to publish information from Oracle Applications.
Modifications implemented as Java programs which include Java that produces html interface or Java business logic AND/OR Modifications to Forms, Reports, and/or Workbooks	Not Required. Restricted-use license may only be used to run licensed Oracle E-Business Suite Applications.	Licenses required: For total number of end users[1] or Processors for which the modifications are deployed.	Not Required: Oracle Alert, Application Object Library, Report Manager, Oracle Applications Manager, EDI Gateway, XML Gateway. Restricted -use for Oracle licensed applications users only: Customer Data Hub. Oracle Programmer for the underlying technology as invoked by the unmodified E-Business Suite Applications. Licenses required: Internet Developer Suite and/or Discoverer Desktop Edition for developers making modifications; JDeveloper for all developers who build Java programs which access application schema and who are not licensed for Internet Developer Suite; For client server workbooks, Discoverer Desktop Edition for total number of actual users[3].
Modifications to the Database	License required: For total number of actual users[3] or Processors.	License required: For total number of end users[1] or Processors for which the modifications are deployed.	Not required: Oracle Alert, Application Object Library, Report Manager, Oracle Applications Manager, EDI Gateway, XML Gateway. Restricted -use: Diagnostic Pack restricted to the instance of the database where the application is run (if there are other database instances not pertaining to the application and the customer wants to use Diagnostic Pack, the customer must buy a full use license of the Diagnostic Pack for the other database instances). Restricted-use for Oracle licensed Applications users only: Customer Data Hub. License required: Internet Developer Suite and Oracle Programmer for developers making modifications; JDeveloper for developers who use to build Java programs which access application schema and who are not licensed for Internet Developer Suite; For client server workbooks, Discoverer Desktop Edition for total number of actual users[3].

March 18, 2015

Notes

[1] End Users: All users and/or devices accessing modified E-Business Suite Applications running on Oracle Database must be licensed. Minimums must be met.

[2] Business Intelligence Publisher (BI Publisher): E-Business Suite Applications include a restricted use of BI Publisher (see restricted-use information in Business Intelligence Publisher section).

[3] Actual Users: All users and/or devices accessing E-Business Suite Applications running on Oracle Database must be licensed. Minimums must be met.

Oracle Business Intelligence Publisher

Oracle E-Business Suite Applications include a restricted-use of Oracle Business Intelligence Publisher to publish and/or view:

1. Shipped Oracle Business Intelligence Publisher reports. Layout changes are allowed. AND

2. Shipped or newly created Oracle Business Intelligence Publisher reports that are modified to access data from the existing Oracle E-Business Suite Applications schema that has not been customized.

Full use of Business Intelligence Publisher is required if any shipped, modified or newly created Oracle Business Intelligence Publisher report:

1. Accesses data from a non-Oracle E-Business Suite Applications data source, or

2. Accesses data from a new schema within the Oracle E-Business Suite Applications that is not shipped by Oracle, or

3. Accesses data from a modified Oracle E-Business Suite Applications schema (e.g., by adding columns to an existing table).

Oracle JD Edwards EnterpriseOne Applications include a restricted-use of Oracle Business Intelligence Publisher to publish and/or view:

1. Shipped Oracle Business Intelligence Publisher reports. Layout changes are allowed, AND

2. Shipped or newly created Oracle Business Intelligence Publisher reports that are modified to access data from the existing JD Edwards EnterpriseOne Applications schema that has not been customized.

Full use of Oracle Business Intelligence Publisher is required if any shipped, modified or newly created Oracle Business Intelligence Publisher report:

1. Accesses data from a non-JD Edwards EnterpriseOne Applications data source, or

2. Accesses data from a new schema within the JD Edwards EnterpriseOne Applications that is not shipped by Oracle, or

3. Accesses data from a modified JD Edwards EnterpriseOne Applications schema (e.g. by adding columns to an existing table).

Oracle Policy Automation includes a restricted-use license of Oracle Business Intelligence Publisher only to create and run reports via the provided Oracle Policy Automation Document Generation Server. In particular, this integration limits Oracle Business Intelligence Publisher reports to only use data passed to, entered into or generated by Oracle Policy Automation. If customers want to create or run Oracle Business Intelligence Publisher reports for any other purpose, they must purchase a full use license of Oracle Business Intelligence Publisher. In no event are Oracle Policy Automation customers licensed to use Oracle Business Intelligence Publisher Server.

Oracle Demantra

Oracle Demantra products are offered under Oracle E-Business Suite, JD Edwards and Siebel licensing models. Regardless from which licensing model these products are procured, the aforementioned Oracle Technology Prerequisites Rules policy applies.

Oracle Master Data Management – Enterprise Data Quality

Oracle Master Data Management – Enterprise Data Quality products are offered under Oracle E-Business Suite and Siebel licensing models (Enterprise Data Quality Standardization and Match, Enterprise Data Quality Product Data Extension, Enterprise Data Quality Address Verification Server, and Enterprise Data Quality Profile and Audit). Regardless from which licensing model these four products are procured, the aforementioned Oracle Technology Prerequisites Rules policy applies.

Oracle Master Data Management

The following Master Data Management (MDM) programs or components of programs do not include a restricted-use of the underlying Oracle Technology: Siebel Universal Customer Master B2B / B2C (a component of Oracle Customer Hub for B2B/B2C or Oracle Customer Hub Add-on B2B/B2C), Oracle Activity Hub B2B / B2C, Oracle Field Service Hub B2B / B2C, Oracle Marketing Hub B2B / B2C, Oracle Sales Hub B2B / B2C, Oracle Service Hub B2B / B2C, Siebel Customer Data Steward (a component of Oracle Customer Hub Data Steward), Oracle / Siebel Data Quality products (Oracle / Siebel Data Quality Matching Server, Address Validation Server, Profiling Server, Parsing and Standardization Server), Oracle Automotive Captive Finance Customer Hub, Oracle Case Hub, Oracle Life Sciences Customer Hub.

Oracle Governance, Risk, and Compliance

Oracle Governance, Risk, and Compliance (GRC) products are offered under the E-Business Suite and PeopleSoft licensing models. The following GRC products include restricted-use rights of Oracle Technology and must adhere to the full-use rules noted below:

  – **Governance, Risk, and Compliance Manager**
Governance, Risk, and Compliance Manager includes: Stellent Financial Compliance Director; Restricted use of Stellent Universal Content Management. Governance, Risk, and Compliance Manager Administrator(s) are permitted direct access to Universal Content Management's administrative tools and user interface for the purposes of installation and maintenance of Governance, Risk, and Compliance Manager.

  – **Enterprise Governance, Risk, and Compliance Manager**
Enterprise Governance, Risk, and Compliance Manager includes: Restricted-use: Oracle Database Enterprise Edition, WebLogic Suite, SOA Suite for Oracle Middleware, Oracle Data Integrator Enterprise Edition, Universal Content Management; each of which may only be used with the Enterprise Governance, Risk, and Compliance Manager product.

Additional details on restricted-use rights for Enterprise Governance, Risk, and Compliance Manager: WebLogic Suite restricted to the following components: WebLogic Server Enterprise Edition and Diagnostics Pack for Oracle Middleware. Only a single instance of Enterprise Governance, Risk and Compliance Manager can be deployed within the WebLogic Suite domain. SOA Suite for Oracle Middleware limited to Web Services Manager, BPEL Process Manager, Oracle JDeveloper, and Oracle Business Rules. Oracle Data Integrator Enterprise Edition restricted to data movement from Enterprise Governance, Risk, and Compliance Manager to Oracle Business Intelligence Suite Enterprise Edition Plus or Business Intelligence Publisher for the purposes of Enterprise Governance, Risk, and Compliance Manager reporting. Universal Content Management: limited to content associated with the Enterprise Governance, Risk and Compliance Manager product.

Full-use information for Enterprise Governance, Risk, and Compliance Manager for WebLogic Suite and SOA
Suite for Oracle Middleware: Full-use of WebLogic Suite and SOA Suite for Oracle Middleware are required if you are doing any of the following (not a complete list):

  • Creating new transformations;
  • Creating new Enterprise Service Bus routings;
  • Creating new Business Process Execution Language (BPEL) processes or sub processes for non-GRC purposes;

- Creating new domain value maps or modify existing domain value maps for unsupported approval types;
- Creating new cross reference tables;
- Defining new security policy for custom web services for non-GRC purposes; and
- Using WebLogic Suite for something other than the SOA Suite for Oracle Middleware in support of the Enterprise Governance, Risk, and Compliance Manager product.

– **Fusion Governance, Risk, and Compliance Intelligence**
Restricted-use: Oracle Database Enterprise Edition. Restricted-use: Oracle Data Integrator Enterprise Edition (restricted to use with Fusion Governance, Risk, and Compliance Intelligence as the only target).

– **Applications Access Controls Governor**
Restricted-use: Oracle Database Enterprise Edition, WebLogic Suite, Oracle Data Integrator Enterprise Edition; each of which may only be used with the Application Access Controls Governor product.

Oracle Primavera

The following Oracle Primavera programs include restricted-use rights of Oracle Technology:

– **Primavera P6 Enterprise Project Portfolio Management**

Restricted-use: WebLogic Server Standard Edition only allowed to run in WebLogic Server Standard Edition instance. No other web applications may be deployed in this instance of WebLogic Server Standard Edition. Restricted to only WebLogic Server Standard Edition features, not the WebLogic Server Enterprise Edition features or WebLogic Suite features. This does NOT include the use of clustering, coherence or EJBs. For example, if a customer wishes to cluster their Primavera P6 Enterprise Project Portfolio Management instance, that would trigger a full-use license of WebLogic Server Enterprise Edition.

Restricted-use: JRockit JVM only used for Primavera P6 Enterprise Project Portfolio Management servers. This is a runtime license that does not allow customers to utilize JRockit JVM for other applications or instances."

Restricted-use: WebCenter Content only valid for workspaces or folders that are built from Primavera P6 Enterprise Project Portfolio Management. Only valid for repositories that store Primavera P6 Enterprise Project Portfolio Management documents, artifacts and work products. Creating any repositories, folders, workspaces, etc. manually outside of Primavera applications will trigger full-use. Only licensed Primavera application users can access the repository. For example, creating a new departmental workspace or folder would trigger a full-use license.

Restricted-use: Application Development Framework. This does not grant permission to customers to build, deploy or resell Application Development Framework user interface components or applications.

Restricted-use: Oracle HTTP Server used for access outside corporate firewall and single sign-on (SSO). May not be used for any purposes outside of those requirements.

Restricted-use: EclipseLink used only for Primavera P6 Enterprise Project Portfolio Management persistence. Run-time only and may not be used to build any other applications.

Restricted-use: Unified Business Process Management Suite and its prerequisites (SOA Suite for Oracle Middleware and WebLogic Suite) for licensed users of the Primavera application who are consuming/participating in the Primavera workflows (workflows within Primavera applications or integrating Primavera applications with Oracle applications) or forms. Any users who need to change or create new workflows will need a full-use license of Unified Business Process Management Suite (or Unified Business Process Management Suite for Oracle Applications) and its prerequisite products. There is no minimum Named User requirement for full use licenses.

Restricted-use: Web center only for portals built using Primavera portlets. Not valid for adding non-Primavera portals, workspaces, etc. For example, a user who creates additional organizational or departmental portals would trigger full-use license of Web center. Additionally, attempts to modify Primavera portals would likewise trigger full-use license.

Restricted-use: Business Intelligence Publisher valid for users to schedule/execute/run reports within the Primavera application. Any users who need to customize or create new reports will need a full-use license of Business Intelligence Publisher. There is no minimum named user requirement for Business Intelligence Publisher for Primavera applications.

Other included components: Primavera P6 Professional Project Management; Primavera P6 Enterprise Project Portfolio Management Web Services; Primavera P6 Progress Reporter; ; Primavera P6 Team Member and Primavera Team Member for iPhone.

– **Primavera P6 Progress Reporter**

Restricted-use: WebLogic Server Standard Edition only allowed to run in WebLogic Server Standard Edition instance. No other web applications may be deployed in this instance of WebLogic Server Standard Edition. Restricted to only WebLogic Server Standard Edition features, not the WebLogic Server Enterprise Edition features or WebLogic Suite features. This does NOT include the use of clustering, coherence or EJBs. For example, if a customer wishes to

cluster their Primavera P6 Progress Reporter instance, that would trigger a full-use license of WebLogic Server Standard Edition.

Restricted-use: JRockit JVM only used for Primavera P6 Progress Reporter servers. This is a runtime license that does not allow customers to utilize JRockit JVM for other applications or instances.

Restricted-use: Application Development Framework. This does not grant permission to customers to build, deploy or resell Application Development Framework user interface components or applications.

Restricted-use: Oracle HTTP Server used only for access outside corporate firewall and single sign-on (SSO). May not be used for any purposes outside of those requirements.

Restricted-use: EclipseLink used only for Primavera P6 Progress Reporter persistence. Run-time only and may not be used to build any other applications.

- – **Primavera p6 Analytics**

Restricted-use: Primavera P6 Reporting Database

- – **Primavera Contract Management, Business Intelligence Publisher Edition**

Restricted-use: WebLogic Server Standard Edition only allowed to run in WebLogic Server Standard Edition instance. No other web applications may be deployed in this instance of WebLogic Server Standard Edition. Restricted to only WebLogic Server Standard Edition features, not the WebLogic Server Enterprise Edition features or WebLogic Suite features. This does NOT include the use of clustering or coherence. For example, if a customer wishes to cluster their Primavera Contract Management instance, that would trigger a full-use license of WebLogic Server Enterprise Edition.

Restricted-use: JRockit JVM only used for Primavera Contract Management servers. This is a runtime license that does not allow customers to utilize JRockit JVM for other applications or instances.

Restricted-use: WebCenter Content only valid for workspaces or folders that are built from Primavera Contract Management. Only valid for repositories that store Primavera Contract Management documents, artifacts and work products. Creating any repositories, folders, workspaces, etc. manually outside of Primavera applications will trigger full-use. Only licensed Primavera application users can access the repository. For example, creating a new departmental workspace or folder would trigger a full-use license.

Restricted-use: Oracle HTTP Server used only for access outside corporate firewall and single sign-on (SSO). May not be used for any purposes outside of those requirements.

Restricted-use: EclipseLink used only for Primavera Contract Management persistence. Run-time only and may not be used to build any other applications.

Restricted-use: WebCenter only for portals built using Primavera portlets. Not valid for adding non-Primavera portals, workspaces, etc. For example, a user who creates additional organizational or departmental portals would trigger full-use license of Web center. Additionally, attempts to modify Primavera portals would likewise trigger full-use license.

Restricted-use: Business Intelligence Publisher valid for users to schedule/execute/run reports within the Primavera application. Any users who need to customize or create new reports will need a license of Business Intelligence Publisher. There is no minimum named user requirement for Business Intelligence Publisher for Primavera applications.

Restricted-use: Unified Business Process Management Suite and its prerequisites (SOA Suite for Oracle Middleware and WebLogic Suite) for licensed users of the Primavera application who are consuming/participating in the Primavera workflows (workflows within Primavera applications or integrating Primavera applications with Oracle applications) or forms. Any users who need to change or create new workflows will need a full-use license of Unified Business Process Management Suite (or Unified Business Process Management Suite for Oracle Applications) and its prerequisite products. There is no minimum Named User requirement for full use licenses.

Other included components: Primavera Contract Management Web Services

– **Primavera Portfolio Management**

Restricted-use: Business Intelligence Publisher valid for users to schedule/execute/run reports within the Primavera application. Any users who need to customize or create new reports will need a full use license of Business Intelligence Publisher. There is no minimum Named User Plus requirement for Business Intelligence Publisher for Primavera applications.
