# Notes on segment information:

### Segment revenue and expense:

Revenue is generated through licensing of software products as well as by providing software solutions to the customers including consulting services and business process outsourcing services. The income and expenses which are not directly attributable to a business segment are classified as unallocable income and expenses.

## Segment assets and liabilities:

Segment assets include all operating assets used by a segment and consist principally of trade receivables net of allowances, unbilled revenue, deposits for premises and fixed assets. Segment liabilities primarily includes deferred revenues, advance from customers, accrued employee cost and other current liabilities. While most such assets and liabilities can be directly attributed to individual segments, the carrying amount of certain assets and liabilities used jointly by two or more segments is allocated to the segment on a reasonable basis. Assets and liabilities that cannot be allocated between the segments are shown as part of unallocable assets and liabilities.
