October 2006 (Special Oracle OpenWorld Preview edition) - HIGHLIGHTS

- [New Berkeley DB downloads](#)
- [OTN@Oracle OpenWorld preview](#)
- [Technical Article: Using Oracle TopLink with Spring](#)

FROM THE EDITOR

Dear OTN Member:

In this final TechBlast prior to Oracle OpenWorld, I want to remind you to take full advantage of the OTN agenda this year. You simply don't want to miss the brainpower in physical presence at the Moscone West OTN

Lounge: Tom Kyte, Steven Feuerstein, Oracle Fusion Middleware Regional Directors, and the Oracle SOA, Linux, and .NET teams, just to name a few. This is the best "Meet the Experts" lineup I've ever seen at this conference.

Throw in daily "Oracle on Linux Experience" sessions, free "OTN's Greatest Hits" CDs, and a raging OTN Night party, and you have the makings of a historic Oracle OpenWorld. Go for it!

Justin Kestelyn, Editor-in-Chief, OTN

♦ Oracle X-Treme: Take Technical Deep Dives at Oracle OpenWorld

This exclusive two-day program for attendees as well as non-attendees comprises highly technical, deep-dive content that you can only get at Oracle OpenWorld. Oracle experts from applications and technology will guide you through a series of intense breakout sessions and hands-on workshops covering Oracle RAC and grid management, content management, business intelligence, Oracle Fusion Middleware, Oracle Applications, and other tracks. [Review Oracle X-Treme content and register.](#)

♦ Now Available: Berkeley DB Release 4.5

This new release now supports multi-version concurrency control, non-stop upgrades for replicated environments, and a pre-built replication framework to simplify development of highly available applications. [Download Berkeley DB Release 4.5.](#)

♦ Now Available: Berkeley DB Java Edition Release 3.1

This new release supports a Direct Persistence Layer (DPL), an EJB-style API using Java annotations, and schema evolution of DPL classes. [Download Berkeley DB Java Edition Release 3.1.](#)

♦ Reserve Your Seats for Oracle Develop Sessions

Oracle Develop—the premier developer program at Oracle OpenWorld 2006—is your best place for in-depth technical sessions, labs, and tutorials from leading experts on Java, SOA, .NET, PL/SQL, PHP and more. Don't miss Oracle SVP Thomas Kurian's opening keynote, "The Next Application Platform" - we highly encourage you to reserve your seating via the [Schedule Builder](#).
