Project and Portfolio management sits at the core of many organizations. But once the critical enterprise data is captured in a project or portfolio management solution, how can you ensure your organization is taking full advantage accelerating your organization's adoption of project management processes and tools through an intelligent, well-designed implementation strategy? Oracle's Primavera Consulting can help you unlock the power of your solutions and deliver better results from your technology investment - increasing operational efficiencies, driving down costs and securing vital data.

Oracle's Primavera Consultants Provide Technical and Business Guidance

Whether you decided to go it alone, teamed up with Oracle consultants, or selected one of our business partners to assist with your implementation, how can you be sure that you are getting the maximum return on your software investment? Oracle's team of highly qualified business and technical consultants are available to review, evaluate, and help improve your implementation configuration, processes, procedures, technical environment and infrastructure – even your integration to other Oracle or third-party systems.

Oracle's Primavera consultants focus on the unique challenges of managing and deploying enterprise infrastructure. Whether your business is looking for high performance and availability to meet the demands of customers and partners, or improved operational efficiency to reduce total spend, Oracle's specialists can help.

Invest in an Implementation Review Package

Oracle will provide consultants to participate in reviews and provide recommendations regarding your organization's unique IT and system requirements as needed. More specifically Oracle can provide:

Application processes and procedures review

- Review current implementation configuration including business processes, security profiles, key data structures, user interface views, set-up and utilization of resources, roles and costs features and functionality, project and activity coding structures

- Review supporting business processes governing project selection and

creation, scheduling execution and control methods, reporting and project closeout procedures

Technical review

- Review the Database Server, Web Application Server and Desktop Clients in the production and test environments for recommended system configurations for running the Primavera suite of applications including Primavera P6, Unifier, Primavera Analytics, Oracle Primavera Prime and/or Instantis
- Facilitate discussions regarding common architectures used in similar environments and planned capacity and projected growth

Interface review (optional)

- Review of systems interfaces including integration into existing Oracle applications and customer integrations into third-party systems, where applicable

Leverage Oracle's methods, tools and extensive experience with customer implementations across diverse industries and geographies. Tight integration across consulting, development, support, curriculum and global delivery puts the entire Oracle team behind your success.
