- Primavera Portfolio Management

Oracle's Primavera Consulting offers a comprehensive enablement program for the suite of Oracle's Primavera products. The customized training programs utilize experienced instructors to lead interactive courses based on proven curriculum supplemented with hands-on exercises and knowledge transfer sessions.

The Primavera Consulting training team will analyze the specific enablement requirements and create a detailed education plan based on the audience, project needs and schedule.

Standard Courses for Unifier

The following standard courses form the basis of our Primavera Unifier Enablement offerings for application administrators and end users. In addition to these standard courses, Primavera Consulting can leverage your investment in Oracle User Productivity Kit (UPK) to create customized process documentation as a foundation for self-guided on-demand learning for your end users.

Class Name	Class Description	Duration Days
Primavera Unifier Administration	This Primavera Unifier Administration training covers user/group administration and access control, administration levels and roles and more. Learn best practices to create and use templates and shell administration.	4
Primavera Unifier uDesigner Fundamentals	This Primavera Unifier uDesigner Fundamentals training enables you to design business processes, attribute forms and shells. Expert Primavera Consulting instructors will help you to develop the knowledge and skills to make effective design decisions that will transform designs into a functioning user interface.	4
Primavera Unifier Reports and Dashboards	This Primavera Unifier Reports and Dashboards training teaches you how to create reports and develop dashboards. You will configure dashboards and use native Unifier reporting tools to extract and display data.	2
Primavera Unifier Cost Management *EXCLUSIVE*	This Cost Management training introduces key cost concepts in Unifier and describes how Unifier manages cost for projects.	2

Primavera Unifier Administration

The Unifier Administration training teaches you how to manage user and group access to company and project workspaces. It focuses on the core skills required for defining

ENGAGE THE PRIMAVERA EXPERTS

Get the most out of your Primavera investment quickly, by engaging the experts:

- **Leading Expertise:** Oracle's own experts providing thought leadership for every Primavera solution.
- **Implementation Experience:** Primavera training consultants bring practical experience to the classroom.
- **Global Scale:** 100+ Primavera dedicated consultants. With OCS reach 17,000 Oracle experts in 145 countries, serving over 20 million users.

data and configuration of Unifier objects.

Learn To:

- Explore administration roles.
- Understand company relationships.
- Test designs deployed from uDesigner, before exporting them to production.

Benefits to You

When you walk away from this course, you will have developed a much deeper knowledge of how to leverage this Primavera solution to work for your business.

Primavera Unifier uDesigner Fundamentals

This Unifier uDesigner Fundamentals training enables you to design business processes, attribute forms and shells. Expert Primavera Consulting instructors will help you develop the knowledge and skills to make effective design decisions that will transform designs into a functioning user interface.

Learn To:

- Follow good design practices.
- Distinguish process types.
- Create data structures, shells, business processes and attribute shells.
- Add functionality to forms, such as consolidation of line items, validation, auto-population, and linked elements.
- Import and export designs for testing and use from other Unifier environments.

Day 1: Engage in Hands-on Exercises

The course begins with an overview of navigation and introduces design and development concepts. You will gain hands-on experience creating data structures and record statuses, and designing a shell and a user attributes form.

Day 2: Design Business Processes

Next, you will dive into designing and building commonly used examples of simple and line item business process types. You will also learn how to re-use forms.

Day 3: Explore Workflows

You will learn about additional workflow functionality, such as conditional routing, building formulas and validation, auto-publishing to Document Manager, enabling workflow actions via email, auto-sequencing, auto-population, and line item consolidation.

Day 4: Integration and uDesigner Processes

You will learn about integration, advanced log design, and uDesigner versioning. Finally, you will learn how to deploy completed designs, import, create, and export design bundles.

Primavera Unifier Reports and Dashboards

This Unifier Reports and Dashboards training teach you how to create reports and develop dashboards in the Unifier Reports and Dashboards solution. To perform data

extraction and display, expert Primavera Consulting instructors will also teach you how to configure these dashboards and use native Unifier reporting tools.

Learn To:

- Create report templates.
- Update shell templates.
- Define permissions.
- Create data cubes and data views.
- Create dashboards.

Day 1: Creating User-Defined Reports

This course begins with expert Primavera Consulting instructors teaching you how to create user-defined report templates and update shell templates. The first day concludes with hands-on instruction to expand your skills so you can import, update and schedule user-defined reports.

Day 2: Viewing Dashboards & Creating Data Cubes

The second day of this course focuses on dashboards. You will view dashboards and then create data cubes, data views and dashboards through hands-on exercises. These exercises will reinforce your learning and help solidify your new skill set so you can apply it to your daily job.

Primavera Unifier Cost Management

The Unifier Cost Management course introduces key cost concepts in Unifier and describes how Unifier manages cost for projects. Learners examine the structure and functions of the Project Cost Sheet, worksheets and work packages. Learners get hands-on experience with the runtime behavior of cost business processes and their interaction with the schedule of values (SOV). Unifier's cost management system supports the use of multiple currencies and exchange rates. This course provides an overview of these concepts and their usage in projects. The course also shows how audit logs provide an accurate chronological sequence of all events or actions performed in the cost sheet. The two-day course wraps up with an overview of P6-Unifier integration with a focus on project design requirements, exchange of cost data and their use in Unifier's cost-related modules.

Day 1

- Signing In and Navigating
- Managing Costs in Unifier
- Cost Business Processes up to end of Schedule of Values – General Spends

Day 2

- Schedule of Values – Payment Applications
- Rules
- Miscellaneous

How are we different?

The Primavera Consulting team is focused exclusively on Primavera and Oracle Technologies, and we have the experts that others turn to for leading practices in

Primavera and Oracle hardware and software implementations. We know how to best optimize your investment in Primavera products and can provide your business with tightly integrated, comprehensive, superior services throughout your ownership experience.

Getting Started

Leverage Oracle's methods, tools, and extensive experience across diverse industries and geographies. Working with Primavera Consulting allows us to provide you with a unified conduit to Primavera experts in Development, Support, Curriculum, and Global Delivery, having the entire Oracle team behind your success.
