

Adobe Corporate Responsibility Report 2015

Letter from our CEO

The digital transformation of our world is one of the greatest shifts in history, on par with the advent of the printing press and the industrial revolution. It is connecting people and technology in ways never thought possible, and profoundly altering business, government and the global economy overall.

On top of being one of the greatest economic engines of all time, digital transformation is presenting new ways of solving social and environmental problems. Access to information, which has increased exponentially, is equipping people to be in better control of their lives and futures. Freedom of expression, while still a challenge in many parts of the world, has never been greater, with new communication platforms and tools emerging almost daily. And while not yet fully realized, a shift to digital media holds the promise of vastly reducing waste and consumption of natural resources.

At the same time, new issues are emerging as a result of this global shift. Many do not have access to the education needed to participate in a new digital economy, and some of the fastest growing sectors – including tech – lack the kind of diversity that reflect our population as a whole. The renewable energy required to power our digital world is not yet available at scale, leaving most data centers reliant on coal and other dirty power sources.

All that said, the accelerating pace of innovation – and astonishing advancements we are experiencing as a result – prove that with determination, incentive and a commitment to the future, our ability to solve global problems is within reach.

At Adobe, we are committed to driving the kind of change that enhances business for Adobe and our customers, while improving the world around us.

Some of our top priorities include:

- Investing in programs to drive greater workforce diversity and inclusion
- Supporting the next generation of creatives and coders
- Powering our operations and digital delivery of products entirely with 100 percent renewable electricity by 2035
- Enabling our customers to save natural resources through use of our digital products
- Operating from a foundation of integrity and ethical conduct, respecting human rights through our employees, business partners, suppliers and customers

In 2015, we were proud to be named one of Fortune's Best Places to Work for the 16th year in the U.S. We achieved CDP's highest score of 100, and were once again on The Climate A List for performance and transparency. For the first time, Adobe was included on CR Magazine's 100 Best Corporate Citizens List. We owe these accomplishments to our employees worldwide who embody Adobe's commitment to investing in local communities, protecting the environment, and upholding the highest ethical standards.

Adobe's opportunity to change the world through our technology, products and business practices is enormous. I'm proud of the impact we are having on society and the environment, and of our transparency reporting on our performance. I invite you to learn more about our corporate responsibility initiatives in the attached report, and to join us in our commitment to a more sustainable future.

Sincerely,

Shantanu Narayen
President and Chief Executive Officer

\$4.796B
Total revenue

Total contribution to political parties

“Adobe inventions are helping drive the creation of ideas and exchange of information in our rapidly changing world.”

— Dr. John Warnock, Co-Founder and Co-Chairman of the Board

Total community investment
\$35M

10% Increase in employees
(13,779 up from 12,499)

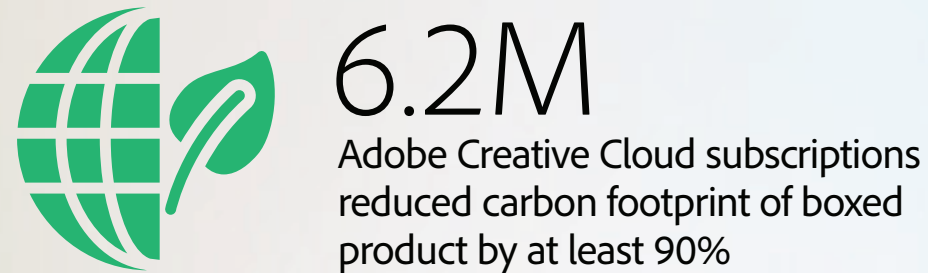

Employee satisfaction

“Great talent that embodies our values is what makes Adobe exceptional.”

— Donna Morris, Executive Vice President,
Customer and Employee Experience

“Our commitment to sustainability goes beyond our operations — it’s about fostering a culture of sustainability among our people, customers, and communities.”

— Mike Dillon, Executive Vice President,
General Counsel and Corporate Secretary
