Product overview

IBM® Cognos® Reporting is a web-based product for exploring, analyzing, and comparing dimensional data within large data sources.

1 Step 1: Access the software

Download the IBM Cognos Reporting software from IBM Passport Advantage® and follow the instructions in the Download Document (http://www.ibm.com/support/docview.wss?uid=swg24037529).

2 Step 2: Evaluate your hardware and system configuration

Review the supported environments information for IBM Cognos Reporting at the Cognos Customer Center (www.ibm.com/support/docview.wss?uid=swg27042164).

Review the system requirements in your product installation guide, available from IBM Knowledge Center (http://www.ibm.com/support/knowledgecenter).

3 Step 3: Access the documentation

Go to IBM Knowledge Center (http://www.ibm.com/support/knowledgecenter) to access the complete documentation, including installation instructions.

4 Step 4: Set up your environment

Create a content store using a supported database. The content store is used by IBM Cognos as a repository for all of the system definitions ranging from user capabilities to report definitions. Review the content store section of the supported environments information for your product at the Cognos Customer Center (www.ibm.com/support/docview.wss?uid=swg27042164). See the *IBM Cognos Business Intelligence Installation and Configuration Guide* for information about creating a content store.

You must have a supported web server.

5 Step 5: Install Cognos Reporting server components

- Ensure that the target computers meet the prerequisites referred to in Step 2.
- Launch the installation wizard using the instructions provided in the *IBM Cognos Business Intelligence Installation and Configuration Guide*.

6 Step 6: Configure and start Cognos Reporting server components

After you install the server components, you must perform the following tasks:
- Create IBM Cognos virtual directories for your web server.
- Set the database connection properties for your content store.
- Save your configuration settings.
- Start the IBM Cognos services.

7 Step 7: Install Cognos Reporting modeling tools

Install IBM Cognos Framework Manager using the instructions provided in *IBM Cognos Business Intelligence Installation and Configuration Guide*.

8 Step 8: Install Cognos Reporting optional components

Install the appropriate optional components:
- Product samples
- Translated product documentation and additional language fonts
