

Gain efficiency integrating Electronic Document Management with Sage X3

An unique, secure and shared repository for the whole of the document processes

Your customers are becoming more demanding and competition is becoming global.

If a few seconds are sufficient to find the right information in your ERP system, it is common to spend several hours to find to the right document update: specifications, data sheets, emails, drawings... It is also common to find one document used in dozens (even hundreds) of cases, these same documents can be replicated across multiple servers in different systems.

Therefore, the classification and manual updating of product documentation can cause lengthy processing times and sometimes costly mistakes!

To meet the needs of users, **Audros Technology has integrated its Audros solution with Sage X3.**

The solution supports the organization, sharing and securing of all documents related to a business, an item or a project.

It facilitates **access to current information and promotes the exchange of knowledge** between employees, partners and customers.

Integrated and evolving EDM

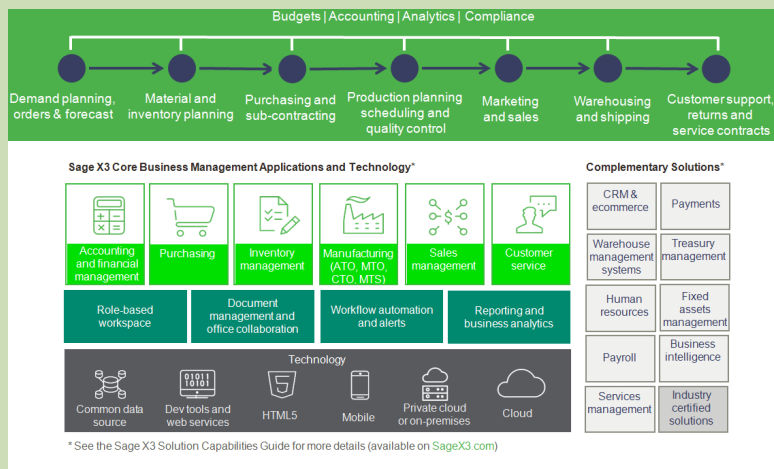

Perfectly integrated, the EDM* Audros solution manages and secures technical documents selected from Sage X3.

A simple click on the attachment button of the standard menu bar provides access to documents depending on context: drawings, invoices, specifications, quotes, reports, etc.

The solution is upgradeable to PLM* Audros for Sage X3.

The upgrade provides features for the management of Product information for the entire company as well as the ability to access all the modules for the automatic creation of documents, process automation and monitoring of projects, etc.

The optional CAD connectors add the management of 3D models and BOM exchange with Sage X3.

EDM solution for Sage X3

*EDM : Electronic Document Management

*PLM : Product Lifecycle Management

Key Features

Intended for companies across all sectors and of all sizes, the Audros solution for Sage X3 meets all your needs :

• Organize your documents
