February 25, 2014: Sage Responds to Small Businesses' Invoicing Frustrations with New Solution, Sage One Invoicing

Sage North America has launched a new cloud solution for small businesses and entrepreneurs. Sage One Invoicing gives small business owners the tools to get paid faster, reduce the time spent on creating and sending invoices, and look more professional to their customers. Sage One Invoicing is available for \$9/month, and monthly subscriptions include unlimited access to online and phone support.

Sage found that 71% of small businesses use WordTM or Excel® to create invoices, 47% send invoices to their clients in the mail, and 57% of small businesses are challenged by the amount of time it takes to get paid.* "There are many choices in the market today for online invoicing solutions, but some are too complicated for a small business' needs and others don't offer enough functionality," said Sage One Product Manager Mike Savory. "Sage One Invoicing is just right for business owners who want to look professional, get paid faster, and get back to doing what they love."

Sage One Invoicing. It's just right.

Sage Grows with Small Businesses

As a small business grows, there may come a time when they require more than just invoicing in order to manage day to day activities and finances. Sage is able to support small businesses as they grow; Sage One Invoicing users have the option to upgrade to Sage One Standard Edition at any time, giving them access to accounting and task tracking features.

Accountant Access to Client Financials

Accountants are an important partner to any business, and accountants using Sage One Accountants Edition may invite their clients to use Sage One Invoicing or Sage One Standard, depending on client needs, providing real-time access to financial data.
