

A man and a woman are working in a warehouse. The man in the foreground is wearing a light blue button-down shirt and is looking down at a stack of papers he is holding. The woman behind him is also wearing a blue shirt and is looking at a computer monitor. The background shows high industrial shelving units filled with cardboard boxes.

Inventory Advisor

REDUCE EXCESS INVENTORY.
*Reduce working capital.
Eliminate stock-outs.*

Sage Inventory Advisor is an affordable cloud solution that helps companies reduce excess inventory and working capital, while eliminating stock-outs. It connects to Sage Evolution data to deliver real-time health-checks on the inventory that makes a difference to the bottom line, reduce the time spent on forecasts, and resolve the optimal investment required to achieve target fill rates.

A web and mobile solution, Sage Inventory Advisor is easy to use and slashes time spent on forecasts and ordering. It can be implemented cost effectively and used in just hours.

Benefits

- Reduce excess inventory by 10%-15% and improve inventory turns
- Reduce working capital and free up 15%-20% of cash tied into inventory
- Improve fill rates by 2%-10% and eliminate stock outs
- Reduce time spent on forecasting by as much as 50%

Fast to implement and cost-effective

A Cloud solution, Sage Inventory Advisor can be implemented cost effectively in just hours

- Allows anytime, anywhere access
- Eliminates local server installation
- Provides worry-free updates and maintenance
- Delivers rapid deployment and scalability
- Best-in-class availability level
- Highly secure using PGP data encryption/decryption

Features

User Interface	Easy to use web and mobile interface uses standard browser behavior with contextual information display for clarity.
Dashboard	Provides critical inventory item level status (out of stock, near out of stock, excess and surplus orders). Provides visibility to inventory PI's and financials. Allows drilldown to data details.
Inventory Forecasting	Dynamic, graphical forecast engine assists user in forecasting and planning for future replenishment orders.
Inventory Monitoring	Provides early warning of stock outs, potential stock outs or surplus orders.
Classification Matrix	Classifies items into nine categories based on calculated metrics such as velocity (times sold), quantity sold/consumed and value of sales/consumption, allowing users to rapidly identify and focus on important items.
Ordering Schedule	Shows what items to order and when to order them to prevent stock-outs or surplus.
Order Management	Provides view of existing orders. Provides exceptions on which orders to amend. Provides exceptions for order cleanup.
Interactive Reports	Provides critical and detailed information to optimize inventory.
Supplier Performance	Shows supplier performance through relevant charts.
Item Data	Provides a single view of all item information, in one place.
