Municipal Billing

**A HOMEGROWN BILLING AND
ACCOUNTING SOLUTION**
*that helps achieve billing
efficiency in municipalities*

We understand that municipalities have a vast range of clients, all billed differently and with different billing frequencies. You may find yourself overcoming these difficulties through manual exception calculations. This can often lead to errors and can negatively affect your cash flow. We'd like to assist in improving the accuracy and timeliness of your billing. Our software can easily be modified to manage a range of customer and billing categories and is flexible enough to handle tariff structures for both fixed and consumption services, making it suitable for use in various African countries. It's also aligned to South African legislation.

The Sage Evolution Municipal Billing Solution is a fully integrated user-friendly solution that delivers essential operational and financial information that is fully GRAP compliant. The solution enables municipalities to improve the accuracy and timeliness of billing and therefore, substantially improving revenue collection and consumer relationships creating transparency and accountability.
