

## How to reset Samsung Galaxy S II LTE (SGH-I727R)

**Warning: all data on the phone is lost after reset**

2. Use the **Volume** button to highlight “**wipe data/factory reset**” and press the **Home (Android 2.3.5) or Power (Android 4.0.4)** button to select.
3. Use the **Volume** button to highlight ‘**Yes – delete all user data**’ and press the **Home (Android 2.3.5) or Power (Android 4.0.4)** button to select.
4. You’re back to the main screen. Highlight ‘**reboot system now**’ and click the **Home (Android 2.3.5) or Power (Android 4.0.4)** button to select.

The reboot takes 5 minutes.

**1. Turn the phone off.** Press and hold **Volume up & down**, and **power** at the same time to enter into the recovery mode. Let go of both buttons when you see the Galaxy S II LTE logo or when it vibrates.

This is Android 2.3.5

This is Android 2.3.5
