

Samsung GALAXY S III Software update guide - Jellybean V4.1.2

In order to update your Samsung GALAXY S III to the latest version of software (Jellybean V4.1.2) please follow the following steps:

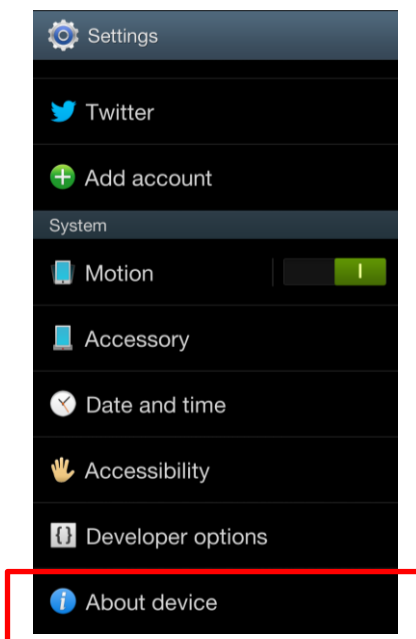

Step 1

Click on **Settings** either from your home page or from the applications page

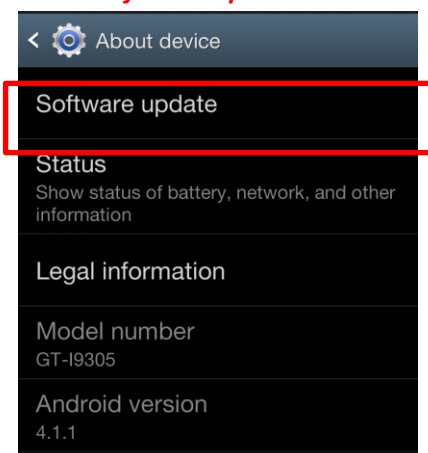

Step 2

Scroll down to **About device** and press on **About device**

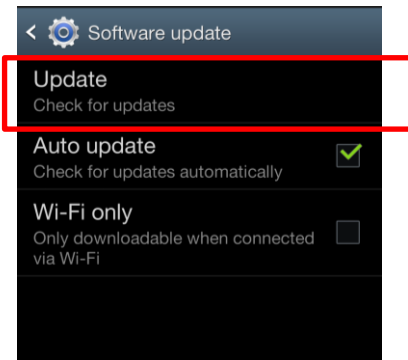

Step 3

Select **Software update**

Step 4

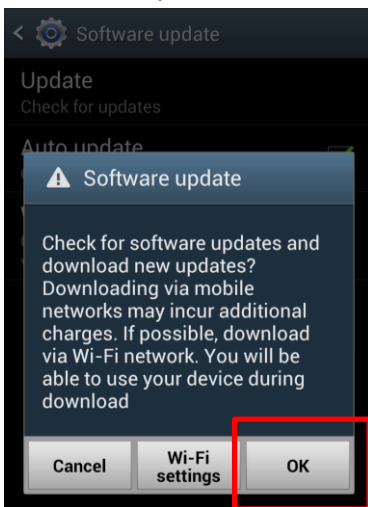

Select **Update**

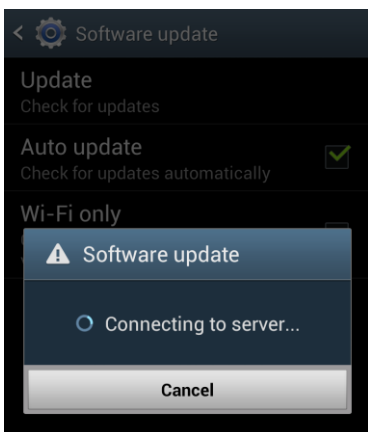

Note: To use Wi-Fi please tick the “Wi-Fi only” option. If “Wi-Fi only” is left un-ticked, 3G/4G connection will be used but will be free of any operator data charges.

Step 5

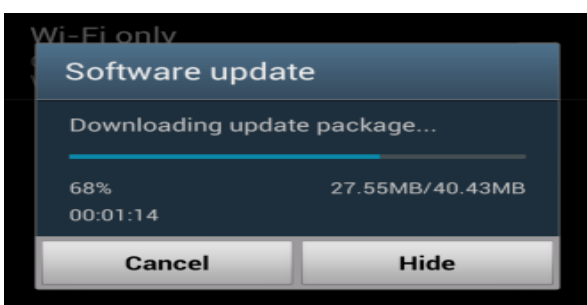

Select **OK** to proceed with software update

Step 6

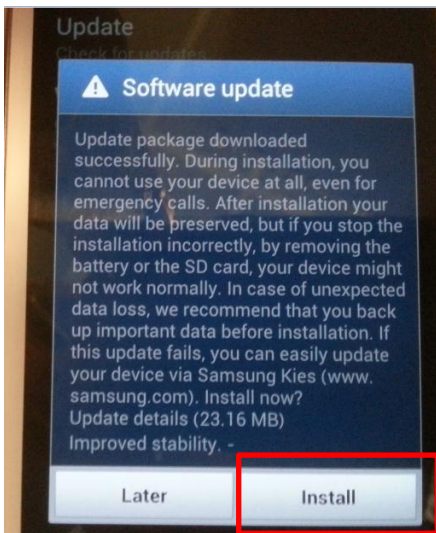

The phone will check for the update and if it is available download will commence

Step 7

Once the download has completed, select **Install**

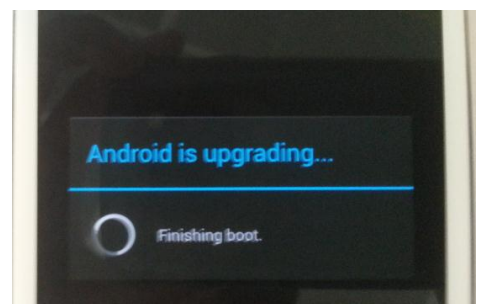

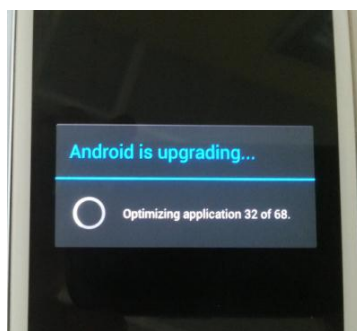

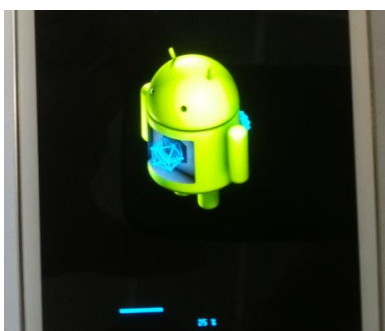

Step 8

Select **OK**

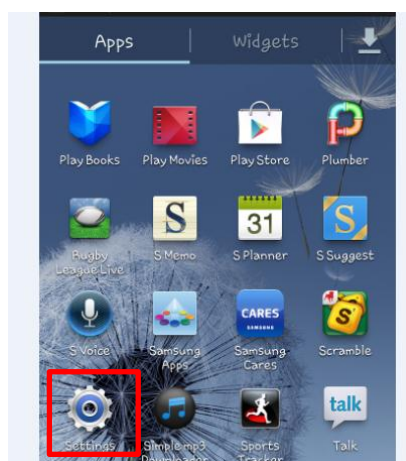

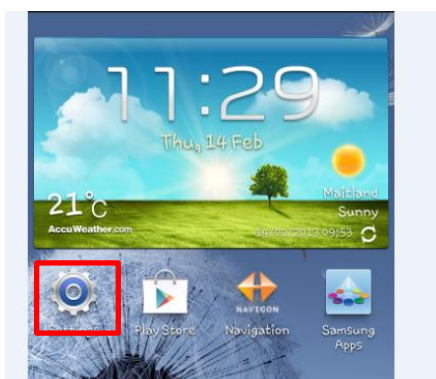

Step 9

Phone will reboot and software installation will occur

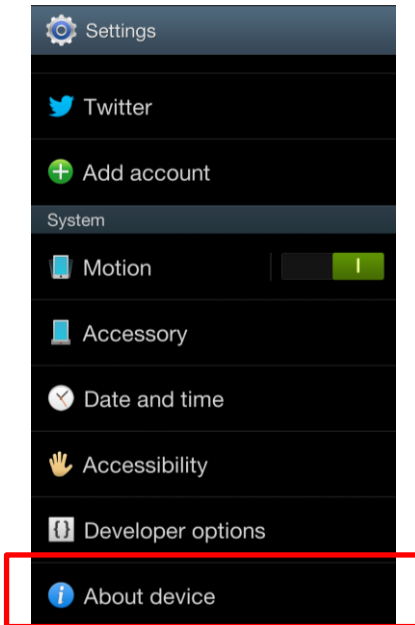

Step 10

After installation is complete go back to **Settings**

Step 11

Select **About device** again

Step 12

Check to ensure that under the “Android version” heading it is listed as **4.1.2**. If listed as **4.1.2** then update is complete.

Note: If “Android version” is not **4.1.2** please repeat Steps 1 to 12 until “Android version” **4.1.2** is displayed
