

Samsung HD450 Series

Elevate guest room TVs to a new standard with affordable innovation and style

Highlights

- Enhance hotel branding and guests' convenience with an easily customizable Home Menu
- Deliver a vivid and immersive viewing experience with Full-High Definition
- Dramatically enhance image quality and display hidden details with Samsung Wide Color Enhancer Plus
- Display moving images with incredible clarity and accuracy with a high Clear Motion Rate
- Provide an enriched, in-room multimedia center with High Definition Multimedia Interface (HDMI) input
- Help save the environment while reducing energy usage and costs with ENERGY STAR compliance

Equip hotel guest rooms with chic and affordable superior-performance displays

Successful hoteliers know that travelers expect in-room entertainment similar to what they experience at home. However, hotel owners and managers must control costs when investing in new displays. Finding affordable in-room displays with essential functionality, superior performance and a modern design can be a challenge.

Samsung HD450 Series high-performing displays include many features that hotels need, at a reasonable cost. The

displays' modern, streamlined design contributes to a pleasant room ambiance and superior viewing experience. The displays include Home Menu to standardize hotel properties and to enhance guests' in-room experience. In addition, the displays help reduce costs with enhanced technology and energy-saving features.

Provide a tailored Home Menu to enhance the viewing experience

With a customizable Home Menu, hotels can conveniently display resources such as the time, date and simple hotel information, and provide guests to access frequently used TV features in user mode. Properties can improve hotel branding by placing welcome message with hotel name and wallpapers on the Home Menu. And property managers can easily configure the display of Home Menu content in factory mode. Then, they can deploy the same content over all the hospitality displays through USB cloning.

The customizable Home Menu reduces the cost burden for hotels with consumer TVs that would otherwise have to adopt solution-embedded hospitality TVs and server systems. With the Home Menu, these hotels can move forward to a solution-based hospitality TV from conventional consumer TVs without incurring a huge expense.

Elevate TV viewing with vibrantly rich colors and images, while capturing all the fast-moving action

Figure 1. With a customizable Home Menu, hotels can provide useful information while improving hotel brand image

Deliver a new reality with vivid HD and Full HD*

The rich and vivid texture of HD TV images deliver a breathtaking viewing experience that takes viewers beyond the screen into a world of total immersion. Especially with HD450 40 inches, guests can enjoy a greater level of entertainment realism than ever before with Full HD resolution which is twice as high as standard HD TVs.

Figure 2. Guests can enjoy rich, vivid and realistic images with Full High-Definition

Display vibrant colors for enhanced images

Using an advanced picture quality improvement algorithm, Samsung Wide Color Enhancer Plus drastically improves image quality and uncovers hidden details. Wide Color Enhancer Plus enables picture color display the way the director originally intended it. With the entire RGB spectrum brought to life on the screen, viewers can experience exceptionally vibrant, yet natural-looking images.

Experience sharp picture quality, even with fast-moving images

Designed for watching quickly-moving images like sports or action movies, Clear Motion Rate (CMR) accurately measures how well an LCD or LED TV can depict the moving images by calculating three factors: frame refresh rate, image processor speed and backlight technology. With a CMR of 60, HD450 Series displays show action-packed movement with sharp detail and vivid contrast while eliminating image distortion.

Figure 3. Clear Motion Rate enables more accurate image presentation

Simplify rich multimedia entertainment

With ConnectShare Movie, guests can simply plug a USB memory drive into the TV and instantaneously enjoy movies, photos or music. And, HDMI provides high-speed transmission of high definition digital data from multiple devices straight into the TV.

Figure 4. Guest can simply plug in a USB for expanded entertainment experience
