Preface

Introduction

This cloud connector, known as the Cisco AnyConnect Cloud Web Security Module, gives the AnyConnect client the ability to let Internet web traffic go out through a CWS proxy directly to the destination without forcing it through the organization's headend. Without Cisco CWS, the traffic must be routed down the VPN tunnel,

Step 3: Click Add Custom Group.

Step 4:

Step 11:

Step 11: In

Step 5: On the Web Security Proxies Exclusion dialog box, in the Access list name box, enter CWS_Tower_Exclude, and then click Create Access List.

Step 6: On the Access List Result dialog box, review the list of proxies added to the access list, and then click

Step 2:

Step 5: Navigate to the secondary RAVPN Cisco ASA's inside IP address, and then launch Cisco ASDM.
