Dissecting a Data Breach (Kill Chain)

You Can't Protect What You Don't See !

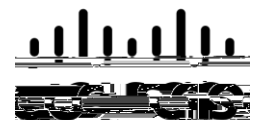

Cisco Identity Services Engine

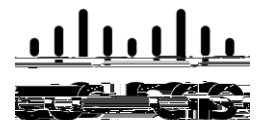

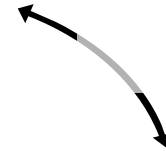

Security starts with 'Visibility'

Threat Centric NAC

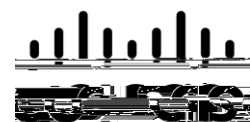

Same ISE for 'Network Device' Administration

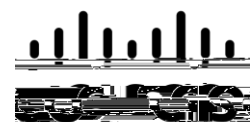

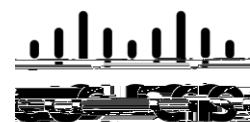

Visibility

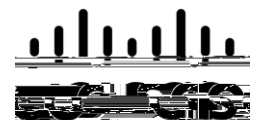

Integrated Threat Defense (Detection & Containment)

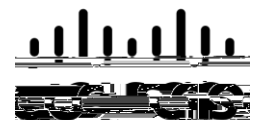

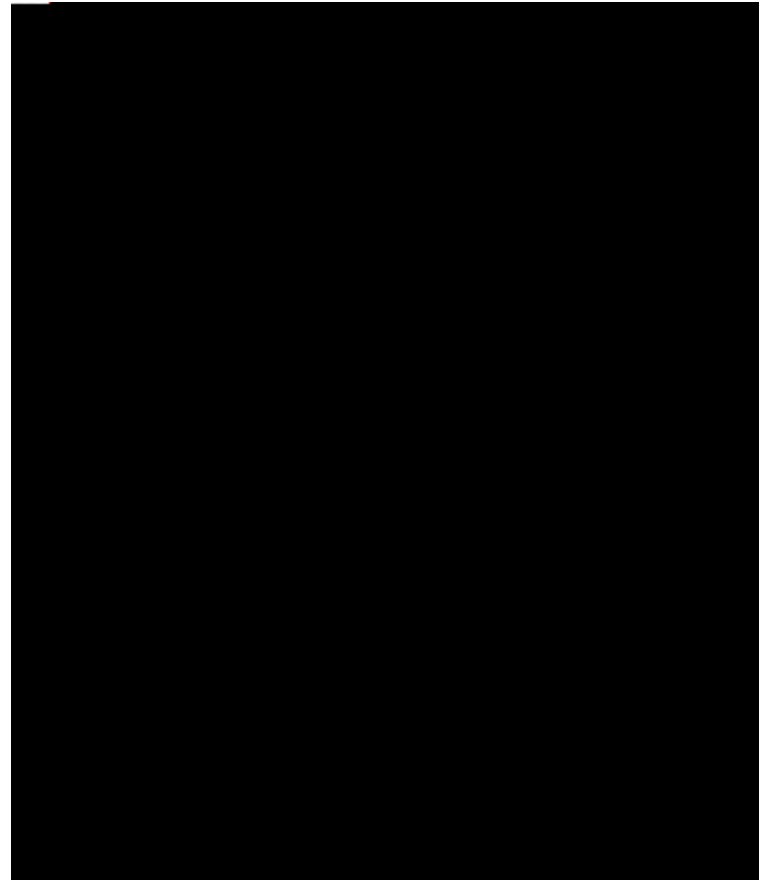

Adaptive Network Control

Quarantine/Unquarantine via pxGrid

Identity
Services
Engineerid

Summary

Three Friends in Security : Identity, Visibility and Enforcement

The network is a key asset
for **threat detection** and
control

NetFlow and Cisco
StealthWatch provides
visibility and **intelligence**

TrustSec provides software
defined (micro)
segmentation
