

organization in order to manage and assimilate a rapidly growing portfolio of products and services.⁹ Networked information sharing and collaboration becomes critical to

Today's networked collaboration capabilities help to foster this process, driving creativity and new insights across geographic borders and time zones. Distributed, heterogeneous R&D and extended teams are able to work together using advanced conferencing and remote whiteboard systems to develop, manage, and mature each project into a final approved product.

Today's flexible video capabilities also allow remote experts and team members to oversee the prototype production line,
